1 P-R-O-C-E-E-D-I-N-G-S 2 2:00 p.m. 3 DIRECTOR MUHAMMAD: Okay, everyone. 4 It's 2:00 and we're going to get started. I just 5 want to check with Amanda. Are we good on our 6 end for everything? 7 MS. OGNIBENE: Yes, I think so. We 8 have everyone here who needs to be here looks like. 9 10 DIRECTOR MUHAMMAD: Okay. All right. 11 Very good. 12 Okay. All right. Good afternoon, 13 everyone. As stated, my name is Faatimah 14 Muhammad and I'm the Director of the Impact Aid 15 Program at the U.S. Department of Education. 16 the call with me today are Jill Martin and Colin 17 Bishop, who are attorneys with our Office of 18 General Counsel, and Amanda Ognibene of the 19 Impact Aid Program. 20 Today's proceedings is an informal 21 predetermination hearing under Section 7009(c)(2)

of the Impact Aid Law, which is Title VII of the

Elementary and Secondary Education Act. Impact
Aid is a federal formula grant program for school
districts whose local property tax revenue is
negatively impacted by the presence of nontaxable federal land such as military bases and
Indian lands.

The issue before the Impact Aid

Program is whether the State of New Mexico's

School Funding Program meets the requirements of

Section 7009 for school years 2019 through '20

and 2020 through '21. We'll be referring to

school year '19 through '20 as fiscal year 20,

and school year '20-'21 as fiscal year 21.

Under Section 7009 if a state can demonstrate that school funding in the state is equalized by a method outlined in the statute and program regulations, the Impact Aid Program can grant permission for the state to reduce state aid payments to districts by an eligible amount of the impact aid it receives. Basically the test is that the disparity between the LEA and the highest per pupil revenue and the lowest

after removing the top and bottom 5 percent of the districts can not exceed 25 percent.

In calculating per pupil revenue we look at all revenue from current expenditure purposes including local, state and federal resources. The data should not include funds that are not revenues for current expenditures. For example, revenues from capital outlie purposes.

At this point I'm going to turn it over -- all right, before I do that let me just continue for a second.

In the Impact Aid -- if the Impact Aid
Program certifies a state for a particular fiscal
year, then the state can reduce the state aid
payments for those districts, but only by a
proportion that is dictated by federal statute.
That proportion is the share that local tax
revenues covered under the State Equalization
Program are to all local tax revenues. Note that
this proportion focuses on local tax revenues.
It is very different from the universe of

revenues that go into the disparity test itself where we include all local, state and federal sources of revenue for current expenditures, the proportion used to be the same for every district because the amount of local tax revenues covered under the State Equalization Guarantee Program was 75 percent for every district.

But with our fiscal year 20

determination we found that local SB-9 revenues
should also count as local tax revenues for
purposes of the proportion calculation between
SB-9 revenues can be used for expenditures. And
since not the same amount is covered under the
SB-9 equalization system, for each district the
proportion now varies for each district.

You should see these slides on your screen. At this time I'm going to turn it over to Amanda so she could go further into the explanation for fiscal year 21 and fiscal year 20.

MS. OGNIBENE: Okay. So I'm going to give a brief overview of the procedural

background for both fiscal years being discussed today because it's quite complicated in terms of the timeline.

So first for fiscal year 2021, which is the fiscal year that you are currently in.

The state initially submitted disparity data on March 6th. Then following the Department's April 15th determination for FY 20, so the prior fiscal year, that the state did not pass the disparity test and required the state to change the treatment of various funds, the state submitted revised disparity data for FY 2021 in response to these required changes on May 31st.

The new analysis was performed using the inclusion method on a revenue basis which is one of the four methods permitted by our regulations. This is different from what the state had used in the past, which was the exclusion method on a revenue basis.

So on June 5th the state requested permission to account for impact aid as a local effort in making estimated state aid payments for

FY 21, so the current fiscal year, prior to our determination. The Impact Aid Program provided this permission by letter dated June 29th, subject to certain conditions, including that the state revise its disparity data regarding the treatment of certain revenues if performing the analysis under the inclusion method and regarding the proportion of impact aid funds that the state can take into account.

So in response to the Department's letter the state submitted corrected FY 21 disparity data on July 20th. The '20-'21 data set dated July 20th is the subject of this hearing for FY 2021.

So on Thursday last week, so just last week, the state submitted another data set with a minor revision as well as some explanatory comments. We provided this submission to the hearing attendees on Friday with the agenda. All parties may talk about the newest disparity data in the hearing today, or you can choose to comment on just the July submission. And all

parties will be able to submit post-hearing comments about the minor revisions submitted last week.

Now to move on to FY 2020, so the prior fiscal year, as I previously said the Impact Aid Program issued a determination April 15th that the state did not meet the disparity standard under the exclusion method on a revenue basis.

On July 31st the state submitted revised data for FY 20 under the same inclusion method on a revenue basis that it is now proposing to use for FY 2021. For FY 20 that July 31st data submission is being discussed at this hearing. Following this hearing the Department may revise its April 15th determination that the state did not meet the disparity standard or may confirm its original determination.

Although the state requested a hearing before an administrative law judge, or ALJ, the ALJ stayed that proceeding pending the outcome of

the Department's reevaluation based on the July 31st data, and that's the determination that will follow this hearing. We explained the sequence of events in the revised hearing notice, but wanted to update you that on Friday evening the state submitted a request to the ALJ to withdraw the hearing request.

Now I'm going to go back to Faatimah to go over the agenda and what we'll be talking about today.

DIRECTOR MUHAMMAD: Okay. Thanks,

Amanda. So in light of the now issue before the

U.S Department of Education, I want to stress

that testimony should be limited to the question

of whether New Mexico's submission satisfies the

requirement for certification for fiscal year 20

and/or 21. And again I'm going to ask if you

would please mute yourself if you're not speaking

at this time.

The following are beyond the scope of this hearing: Testimony on matters such as the fairness or lack of fairness of the School

Funding Program, the fairness or lack of fairness of Section 7009 or the Department's regulations, and the funding needs of particular school districts. Also beyond the scope are issues that are settled in the U.S. Supreme Court's 2007 Zuni decision, namely there's a procedure for calculating the top and bottom 5 percent of districts as part of the disparity test.

In addition, which we understand that districts may raise the issue of the state's reduction of state aid due to districts' receipt of CARES Act funds which may be pertinent to the fiscal year 21 disparity data, issues relating to the use of CARES Act funds by a district are beyond the scope of this hearing.

There is one more topic that is not within the scope of this hearing, and that is the temporary restraining order that was issued by a New Mexico state court. While we understand that the parties may have different positions on the interpretation of the state law provision on the 75 percent of impact aid that the state may take

into account, those arguments are not relevant to this hearing.

The federal impact aid regulations are clear in that calculating the proportion of impact aid that a state may deduct, the proportions must be calculated on a district-by-district basis and not on the basis of a general rule. In the Impact Aid Program determination on fiscal year 20 that we issued in April we were clear that the proportion would be done on an individual district basis.

that we specified in our notice will be the subject of today's hearing. The state has represented to us that they have included the SB-9 local tax revenues in the proportion calculation and that they have calculated the proportion for each district separately in accordance with our regulations. Thus, while you may comment on whether this proportion is calculated correctly or incorrectly for a particular district, we are not entertaining

comments related to whether it is lawful or unlawful for the state to do so on a district-by-district basis, which is what the Impact Aid regulations require.

If necessary I will remind speakers to confine their testimony to whether New Mexico's submission satisfies the requirements for certification for fiscal year 20 and/or 21. On the other hand, all relevant arguments and objections that an LEA has pertaining to the disparity test submissions may -- must be raised on the record of this proceeding in order for these arguments and objections to be considered.

So I'll just repeat that. All relevant argument and objections that an LEA has pertaining to the disparity test submissions must be raised on the record of this proceeding in order for these arguments and objections to be considered.

This is an informal open hearing. We will hear specifically from the four school districts who requested this hearing, but we have

reserved time at the end of the meeting in case other districts would like to present their views on the state's data submission for either or both fiscal years and the data compliance with the requirements in Section 7009.

After this hearing we will hold the record open for post-hearing written comments.

We will review the state's data and consider the views expressed in this hearing and in the written submissions. We will make a decision as to whether the requirements for certification have been met separately year for fiscal year 20 and fiscal year 2021 and issue two separate decisions.

I ask each speaker to identify
themselves for the record each time they speak
along with their organization or district. We
ask that you mute your microphone when you are
not speaking. We encourage those who are
speaking to use video if they would like, but
please turn off your video if you're not
speaking. These proceedings are being recorded

and will be transcribed. So once again, please state your name and your organization when you speak.

We will start with issues common to the data submissions for both fiscal year 20 and 21. First we'll hear from the school districts, then the state. Then we may have questions for either the districts or the state. Next we'll hear comments on issues unique for fiscal year 21, and finally issues unique for fiscal year 20. We will try to save our questions until the end of each section. Once each of the three sections is concluded we will open the floor to any one who wishes to express views.

(Telephonic interference.)

DIRECTOR MUHAMMAD: Okay. Go ahead.

MS. CHAPPELLE: Okay. Thank you,
Director, and thank you everyone of the
participants for being here for this extremely
important issue.

Director Muhammad and Ms. Ognibene,

I'm a little confused and I just want to make

1 sure I'm understanding with respect to the 2 relevance of fiscal year 2019 in this proceeding -- or I'm sorry, you said fiscal year 2020. 3 Мy 4 apologies. I thought that that was a closed 5 issue, and so I'm struggling to understand your expectations about that issue in this hearing. 6 MS. OGNIBENE: 7 So we're talking about 8 the FY 2020 revised data that was sent to us in 9 That's what we're talking about in this July. 10 hearing. 11 MS. CHAPPELLE: Okay. Good. So I just wanted to clarify that we're not going back 12 13 to last year's determination to --14 MS. OGNIBENE: No. MS. CHAPPELLE: -- kind of have a 15 16 second bite at the apple. That's a closed issue. 17 Am I correct? 18 MS. OGNIBENE: Yes, we're looking at 19 the resubmission of the data using the inclusion 20 method on a revenue basis. 21 MS. CHAPPELLE: Okay. So essentially what I'm then hearing or I'm trying to understand 22

1	is: are you allowing the state to move forward
2	with both submittals, and is that why we are
3	looking at FY 20?
4	MS. OGNIBENE: Yes, we're looking at
5	both data submissions.
6	MS. CHAPPELLE: Okay.
7	MS. OGNIBENE: The 20 data submission
8	that we're looking at now was submitted under a
9	different method, which is the same method that
10	they're using for 2021.
11	MS. CHAPPELLE: My apologies. So
12	essentially what you all are expecting from us is
13	our analysis on why we believe both of those
14	submittals do not meet the requirements?
15	MS. OGNIBENE: Correct.
16	MS. CHAPPELLE: Okay. Now Director
17	Muhammad, you also indicated that all of the
18	arguments must be raised on the record.
19	DIRECTOR MUHAMMAD: Yes.
20	MS. CHAPPELLE: I noticed we have some
21	pretty limiting time constraints. By the record
22	are you meaning this hearing plus written

comments that will follow or are you meaning this 1 2 hearing? 3 DIRECTOR MUHAMMAD: I'm meaning the 4 hearing and the written comments that follow. MS. CHAPPELLE: 5 Okay. Because I do have a concern, Director, that the time allotted 6 7 -- these are pretty complex issues, and so the 8 time allotted is pretty difficult for us to be 9 able to make a pretty cohesive argument about all So I didn't know how you wanted 10 of our concerns. 11 to address that. We've got three schools with 12 pretty distinct concerns, some common, some distinct, and we've worked hard to kind of 13 14 consolidate that, but wondering what we should do if we find ourselves running out of time. 15 16 MS. CHAPPELLE: Well we also -- can 17 you state what district you're from again please? 18 MS. CHAPPELLE: Central Consolidated 19 School District, CCSD. 20 DIRECTOR MUHAMMAD: Okay. Thank you. 21 Well we also have the written comments. 22 we begin the proceedings and we look at the

written comments, I think we'll have a better assessment. And then I may be able to be a little flexible, give or take five minutes or so here or there. So why don't we begin and see.

MS. CHAPPELLE: We've got a couple other threshold issues, and what I want to do for my piece is -- I'm not sure it makes sense from the legal perspective. I'm going to kind of wrap up all of our three schools' thought processes, and so it might make sense for me to go at the end and you to have our expert testimony at the beginning. I wasn't sure if you were amenable to that type of modification.

DIRECTOR MUHAMMAD: Right now we have the LEA comments first. So you prefer not to go first? Is that what you're saying? Am I understanding you correctly?

MS. CHAPPELLE: We have three schools, right? So we've got Zuni, Gallup and CCSD. We have a prepared PowerPoint that our finance folks from Zuni and Gallup are going to walk through.

And from the legal perspective I wanted to wrap

up those comments together, and so I wanted to 1 2 follow them is what I'm saying. 3 DIRECTOR MUHAMMAD: Okay. That's fine. 4 5 MS. CHAPPELLE: All right. 6 DIRECTOR MUHAMMAD: Okay? 7 MS. CHAPPELLE: And I know that the 8 attorney for Gallup and Zuni does have a concern 9 about the existing TRO, so I would like to have that addressed as well. It's a concern I share. 10 11 DIRECTOR MUHAMMAD: Okay. 12 MR. SANCHEZ: Madam Director, this is 13 Andrew Sanchez. I represent Gallup-McKinley, 14 Grants-Cibola, Zuni with regards to these 15 proceedings as well. 16 My concern is that it appears to me 17 that you're excluding any argument of whether or 18 not the PED is currently -- obviously doesn't 19 want to address whether or not they're acting in 20 violation of the TRO, and that's fine. However, 21 there is -- those issues do need to be at least

addressed with regards to those fundamental

concepts of whether or not the PED is actually conveying accurately how and depicting how public schools are actually financed in the State of New Mexico. And I understand that you have a formula, but it seems to be that that formula does require some fidelity to the truth of how schools are actually financed. It doesn't seem to be a stand-alone litmus test that does not accurately reflect how schools are funding.

So is that just simply off of the ability of any of the LEAs to discuss how in fact they are approaching their budgets, how they in fact are taking the credits, how in fact they are looking at the revenues that come in and come out with regards to this issue?

MS. MARTIN: I can actually take that question. This is Jill Martin from the Office of General Counsel at Department of Education.

And I believe I understand what you're saying about the accuracy of information. What is relevant to this predetermination hearing is the data that is in the disparity test

submissions that the state have presented. So to the extent that you have any arguments or disagreements with what that data presents -- for example, they are showing revenues received by districts. If you have an argument that one of those data tabs is not accurate, you may certainly raise those issues, yes.

MR. SANCHEZ: Well thank you, Ms.

Martin, but my more -- I believe that that's also probably going to be subject to some discussion, and I'm glad you clarified that. However, what about the fundamental question that is the subject of the TRO is that the Public Education Department is setting forth or conveying to your agency that there is in fact this funding formula that does not actually exist in -- that's certainly argument, but does not exist in reality and how it is actually funded within the state.

I do not expect the Agency to resolve that issue because it's certainly a subject of a state court and a state judge; however, I think that that does speak to the accuracy that you

require under your federal regulations and the assurance that the PED's required as to the accuracy of that information.

I don't think that fidelity to actual determination of whether the state is equalized is supposed to be blind to the actual realities of what goes into the coffers of each public school district based on the SEG formula and based on the provisions of state statutes.

So I don't expect the Agency to resolve that issue of interpreting state law, but there does need to be some at least acknowledgment and permission to the LEAs to show where the actual funding differs from the data supplied.

DIRECTOR MUHAMMAD: Okay. This is

Faatimah speaking. So if it is directly tied to

the accuracy of the data in a disparity test

submission, then yes. Otherwise, then it's

outside of the scope of this hearing.

Okay. So what I would like to do at this time is to just make sure everyone's clear

1 on the proceedings. And then as stated after 2 this hearing we'll hold the record open for posthearing written comments. And we will start with 3 issues common to the data submission as stated 4 5 for fiscal year 20 and 21. And once again I'm going to ask 6 7 everyone if they would mute if they're not 8 speaking. And let's begin hearing from the 9 districts on issues relevant to fiscal year 20 and 21 disparity test data. 10 11 So on your screen -- okay. If you 12 could put the agenda back up? MS. OGNIBENE: I think the districts 13 14 may have slides to present. 15 DIRECTOR MUHAMMAD: Okay. And they --16 Amanda, just give them control? 17 MS. OGNIBENE: Yes, I put Jvanna in 18 the presenters group. If there's anyone else who 19 needs presenter access, send me a chat or let me 20 know. 21 DIRECTOR MUHAMMAD: This is Ms. 22 Muhammad again. Jvanna, do you have control?

1 MS. HANKS: I am attempting to put up 2 the PowerPoint. DIRECTOR MUHAMMAD: 3 Okay. 4 MS. HANKS: Can you see the PowerPoint 5 on the screen? DIRECTOR MUHAMMAD: 6 Yes. 7 MS. HANKS: Okay. My name is Jvanna 8 I'm the Assistant Superintendent for Hanks. 9 Gallup-McKinley County School District for Business Services. 10 11 As Andy Sanchez had previously mentioned, one of the issues that we're going to 12 13 look at is specifically out of 222.161, the data 14 projections submitted with assumptions 15 accompanied by an assurance as to their accuracy. 16 Now I had asked for a copy of that assurance, but 17 I'm not sure if that's a separate document and I 18 wasn't able to find it in any of the items that 19 were sent to us Friday. 20 And then adjusted actual data for the 21 fiscal year must be submitted. So that kind of goes -- my question is to the data that's being 22

submitted, when does that actually have to be implemented? And so these are kind of questions that will be part of this presentation as well as our follow-up comments. As indicated previously, we're looking at the accuracy of the data that's been submitted.

When we look at our current statutes in comparison to the data that's being submitted, there's a very specific definition in state statute for local revenue. And so that's -- as you've noticed I've bolded some of the information on the screen. And then also the federal revenue that's being considered and then the percentages that those items must be considered as part of state law, including 75 percent of course reserve and 75 percent impact aid.

Just looking at the dynamic of (Telephonic interference.)

DIRECTOR MUHAMMAD: I'm sorry. This is Ms. Muhammad speaking again for Impact Aid.

Please mute if you're not speaking. We're

getting a lot of feedback. Thank you.

MS. HANKS: And so the state statute in comparison to the data submittal is clear. Where we've got some percentages which are differentials and then a different definition of local revenue, this is what's currently in New The language is Mexico's state funding formula. clear on what local revenue is. The language is clear about the percentage. And then the language is clear about the type of revenue to consider. Again this is all in comparison to what's being submitted, especially in table 5 I believe, which is the proportionality table where we've got some differential percentages.

And then the federal funding revenue, again it's clear at 75 percent on both the federal course reserve and impact aid.

Now kind of what we've heard is that the federal law requires a certain calculation.

And that's true, but the Federal Government does not tell the state what funding formula to utilize. The federal statutes only tell us based

1

19

20

21

upon your current state statute what does your funding formula actually show? And so while there was specific information given and specific directives given on how to include things, the question is does that actually accurately reflect what's happening in the State of New Mexico? And that's where we kind of are running into an issue.

optional percentage, I looked through everything that I could find and cited many of those documents here. The statutory language was changed in Senate Bill 418 in 1999. It is very specific. I have looked through presentations, policy briefs, anything that I can find to mirror the data that's being submitted, the accuracy of the data that was submitted by the state and I cannot find a single document that kind of reads to that.

So the question is: is the 75 percent optional? Is it optional to take less than 75 percent of the half mil or less than 75 percent

of impact aid? I have not found anything of that. And actually when I asked that question as I was spinning my budget, the state actually told me specifically that the current process is to calculate budgets based upon the 75 percent credits required by New Mexico statute.

If the legislature wants to make changes, that's fine. That's completely within their power to do so. I don't have any documentation of that happening as far as those changes being made to comply with the data submittal that's been given.

Other items not modeled. Now I understand that you do not want to discuss CARES crediting. I'm not going to discuss the legality of any of that. What I am going to discuss is modeling of the reduction of state funding based upon the crediting of CARES funds.

So this is an issue unique to FY 21, and we can definitely come back to it based upon the agenda. So I'm going to kind of go forward and probably circle back to that.

Items not modeled. So there was a provision that was put in regarding a reduction, protection from program cost reductions. I don't have any data on this, and so this is an area where we are actually going to request more data. The state is supposed to be providing any additional supplement to school districts or charter schools that are experiencing a reduction in program costs. And that's for 2020 through 2022 in our New Mexico state statutes. So this is an area that I'm actually going to be requesting more information on because I didn't see it modeled anywhere.

Items not modeled that were in my FY
21 request is that the state presents local
charters and districts together and state
charters separately. Now each year there's a
fluctuation between school districts moving in
and out of whether they're a local charter or a
state charter. And so these are the schools that
applicably move from one designation to another,
and that was all approved by the State of New

Mexico before they did that. So that is an item that could and should be modeled in the data submittal.

Instructional materials. So there is this ambiguity in how we're actually receiving our program costs or SEG funds in relation to instructional materials, early literacy and mentorship funds. We've been told that the components are calculated -- some are calculated on actual units. Others are just considered when the statewide total SEG was funded. We're still just unsure of what that actually means.

Revenues. So I do have a question now that we've moved to an inclusion method. So the revenue portion, now that we've included these other items, are there other funds that might be pulled in now that due to -- due to the inclusion of the special populations, are there more state funds that we have not previously included?

Because that is a change in methodology that we hadn't seen before.

In Yazzie/Martinez the legal opinion,

we're still kind of looking for clarification on what amount of altercation indicates if the original state aid formula is still in effect or if there's been significant changes. And we kind of get different legal opinions from the state depending on what court we're in. So in the motion to dismiss Yazzie/Martinez the Public Education Department's legal team said the system in place is substantially different from the system in place during the trial. But in the legal opinion for impact aid, the state aid system is still in effect, just modified to address the concerns. And so we're not actually sure what the legal stipulation is on actually whether or not a formula still exists as it previously did.

The last thing that I'm going to kind of talk about is available revenue. And so the state has funds that should be distributed to public schools but is not being distributed to public schools. And the reason for this is because they're underestimating the amount of

1

19

20

21

credits that they're going to receive, so they never actually fully distribute the appropriation.

And so year after year we're seeing a reversion of funds from the state, and the state is not actually distributing those. And these are pretty substantial numbers. These are resources that should be going out to public schools, but are not being distributed out to public schools. And so that is an ongoing question for the district as well as to how those revenues should be treated as they are available. They're just not actually being distributed.

And I'm going to turn it over now.

MR. ROMINE: Good morning, everyone.

This is Martin Romine. I'm the Director of Finance for Zuni Public School District.

First of all, I'd like to thank the

New Mexico Public Education Department for their

new submission. On your screen in front of you

is table 1, which shows the -- on the left side

the top 5 percent for weighted pupil school

districts. On the right side is the bottom 5 percent.

As you look at those ones on the left, the schools highlighted in yellow are schools that receive oil and gas revenue. The school districts highlighted in salmon are those schools that receive emergency supplemental. The one school highlighted in blue gets an \$8.2 million a year appropriation from the Department of Defense. The charter schools receive substantial additional private donations. And I'm not here to criticize any of those schools. I'm happy for what they get. I'm happy they are in the top 5 percent of funded school districts.

However, on the right side you will see that the lowest -- the highlighted districts -- those highlighted in gray are all charter schools. The ones that are not highlighted are districts. You will see the lowest funded school district according to the new submission by the State of New Mexico is Zuni Public School District, the district that also happens to be

the only Native -- 100 percent Native American district, a district that has no way to raise property tax revenue.

And as I thought about this, as I looked at this table, it's something that we hadn't seen before from the State of New Mexico, because this is a new formula that they have submitted. It screams to me that what the Federal Government is allowing, what the State of New Mexico is implementing smacks of institutional or systemic racism, and we know what an issue that is in today's society.

I'm not speaking about fairness or unfairness, just an observation that I'm seeing that those schools, that this school district that has the largest proportion of Native

Americans in the district, has no funds to -- no way to raise property tax funds, is also the lowest funded district in the state. And hopefully through -- as we finish our presentation today, we'll be able to impress upon everybody the importance of the state abiding by

the statutes that they have -- that have been legally passed by the legislature and considering property funds that all school districts in the state raise and should be distributed.

I believe Ms. Hanks talked about local revenue. I would like to talk about one revenue stream that we brought up in last year's hearing, but that the Impact Aid Department, USDE, did not address in their decision of April 15th, and that is the half mil levy.

As you can see in Section 22.8.25, there is a statute that says every school district has to raise a half mil levy. This half mil levy is then distributed statewide through the SEG. However, of that half mil levy mandate there are only three of 89 school districts that collect a true half mil. The average collection is just -- is slightly less than a third of a mil. One district doesn't even collect four hundredths of a mil. The net effect of USDE allowing the State of New Mexico to not abide by its own statutes is a loss of revenue of over \$8½

million, not one time, but each and every year.

It's been going on probably for the last 35 years as the state began taking credit for this half mil money in approximately 1985.

So this is revenue that should be collected, should be distributed, should be received by the students. Not only is it not being received, when you look at the proportionality credit percentages calculated by the state, this lower mil levy collected by districts also affects the percentages that school districts will now be credited for in their SEG.

It is my hope that the Federal

Government would now look at the state law that

New Mexico has duly passed as one that is not

being followed, not being adhered to, which is

actually harming the students in the State of New

Mexico, but is actually -- I know you talked

about not unfair, but -- or unfair is probably

not the word I would use -- and illegally not

abiding by a legally passed statute.

I will not get into what yield control is. It's a very difficult formula reassessing property values, but this is -- yield control is what the State of New Mexico uses to justify not collecting a true half mil.

The legislature has had opportunities to fix this problem back in 2003. There was a House bill proposed, No. 948. The legislature did not approve that bill. It's been brought to the attention of the legislature that this was an issue, that it could be easily exempted from the yield control statutes as educational technology equipment is not subject to the yield control statutes.

The legislature is aware of this. It was brought out in a legislation -- legislative

Education Study Committee briefing or hearing

last Monday, the 24th of August. When they

admitted to the problem and suggested various

methods to fix it; it is a problem that needs to

be fixed, the legislature has the authority to

fix it, the legislature has refused to fix it.

That in and of itself shows that if the Impact
Aid Office allows the state to continue taking
credit for impact aid dollars, they are in effect
saying yes, you have the statute, but it doesn't
really matter if you live by that statute or not.

Why has the state not done anything about it? It's a difficult issue to raise property taxes. It's not fun for legislators. It's not something that any of them want to do. However, that should not dismiss what is actually happening in the State of New Mexico with half mil money.

I'd next like to talk about what happens with the two mil money, the SB-9, as it is called in many parts of the state. It has now been ruled by the Impact Office -- Impact Aid Office that the SB-9 monies have to be included in all the revenues when the state submits their disparity analysis. I would contend, along with the other districts that are -- that filed for this hearing, that since all federal PILT-related revenues, be -- those being impact aid-enforced

reserve, are considered in the credits taken by the state, that any property tax-related local revenue should also be considered for the credit when the state takes credit for those revenues. That would include SB-9 money, spaceport money, and any other revenues that are property tax-related that give revenues back to the school districts.

To not do so would allow those districts that raise those revenues but are at -- do not have credit taken for them to have substantial revenue sources opportunities for their students that are not available to other districts.

What would this change mean to the State of New Mexico currently, the impact aid funds considered for credit? And as a reminder 95 percent of those funds, over 95 percent are raised by New Mexico's Native American students. The credit is just under \$63,500,000. The half mil funds considered for credit are just over \$23,400,000. The credit \$17,561,000 if the state

were required to consider all local revenues in a like manner as they do the half mil money right now. The credit to the SEG would be over \$96 million.

We need to make sure everyone understands there is only one district in New Mexico that is not collecting currently the SB-9 revenue. That would be Los Alamos who gets the Department of Defense money for the lab that they have in Los Alamos.

It's our contention that the State of New Mexico recognizes local revenue as being revenue that should be subject to the credit.

Now that the Federal Government has recognized that SB-9 dollars are part of those dollars that are recognized as local, it only follows that they should also be subject to the credit.

I believe that for now -- I have some issues that are -- that pertain strictly to 2020-2021. I don't know if we want to talk about those right now or if we want to hold those for a little later in the discussion.

1 wanted to know if you wanted me to finish up with 2 the questions right now or wait until the last section. 3 4 DIRECTOR MUHAMMAD: I'm sorry. You 5 were breaking up. Can you say that again? My apologies. 6 MS. CHAPPELLE: I just 7 wanted to know if you want me to finish up on --8 I mean add the legal component on this section or 9 wait until the end. 10 DIRECTOR MUHAMMAD: If there any additional comments that are -- in regard to the 11 data submission that impact both '20 and '21, you 12 13 want to go ahead before I turn it over to the 14 state? 15 MS. CHAPPELLE: Sure, I'll do that. 16 So --17 DIRECTOR MUHAMMAD: And if you could 18 state your name again for the record? 19 MS. CHAPPELLE: Yes, absolutely, 20 Director. 21 This is Germaine Chappelle and I 22 represent the CCSD School District, but we also

are working together as a team, Zuni, Gallup and CCSD. And I believe Grants has indicated they are in support as well of these efforts, is my understanding.

With respect to the things that are in common between the 2020 and 2021 submittals in terms of things that we are concerned about, two things rise up pretty quickly. And one is that in -- following state law and the -- I mean the federal law and federal methodology that is relevant to this proceeding the state must also follow state law. And that was very well-articulated in the 2020 determination from the Impact Aid Program.

And with respect to that I do want to note that the state still has an open proceeding regarding the Martinez/Yazzie litigation. The state did request for dismissal. That was ultimately denied. I do think that's important and we will obviously discuss that more in our written briefing.

In addition to that the point that Mr.

Romine was just discussing regarding making sure that we equalize not just operational dollars but capital as well -- and with respect to capital we're talking about the five mil, House Bill 9 and other in-lieu-of-property-tax mechanisms in the state. The 2020 determination indicated that was important. That still is an open issue that the state hasn't fixed. And we believe that with respect to issues in common from 2020 and 2021, both of those are extremely important.

The other things I want to discuss are aimed more at 2021, and so I will move to that at the appropriate time, but from our analysis it does not currently appear that even with the state's latest submission their 2020 submittal complies -- I'm sorry, does not comply with federal law. Thank you, Director.

DIRECTOR MUHAMMAD: Okay. Thank you.

This is Director Muhammad again, and if there

aren't any additional comments from the LEAs, I'm

going to turn it over to the state now for

comments.

MR. SANCHEZ: Madam Director, this is
Andrew Sanchez again. I just wanted to clarify
something. I understand that the PED has
withdrawn its appeal for fiscal year 2020. Does
that have any effect in terms of this
predetermination hearing as to why the Agency is
asking for fiscal year 2020 data even though that
they -- that that appeal seems to have now been
rendered moot by the action of the PED itself?
DIRECTOR MUHAMMAD: One second.

MS. MARTIN: Hi, this is Jill Martin again from Office of the General Counsel.

We -- the Impact Aid Program is
looking at the revised submission of data was
submitted by the state during the appeal that was
before the administrative law judge. Because
this withdrawal request has not been ruled on by
the ALJ, we are not going to comment today on the
effect of that. We're proceeding today as
planned with taking comments on that data.
Thanks.

MR. PEREZ: Madam Director?

1	DIRECTOR MUHAMMAD: Yes?
2	Thanks, Jill.
3	Yes?
4	MR. PEREZ: This is Max Perez,
5	Superintendent for Grants-Cibola County Schools.
6	And just for the record I want to let you all
7	know that we are in support of the efforts of my
8	colleagues from the other LEAs, and we will
9	submit our comments and questions in writing.
10	DIRECTOR MUHAMMAD: Okay. Thank you.
11	So no verbal comments from the State at this
12	point?
13	MR. PEREZ: There are no verbal
14	comment from Grants-Cibola County Schools at this
15	time, unless legal Mr. Sanchez?
16	MR. SANCHEZ: Nothing, Madam Director.
17	DIRECTOR MUHAMMAD: Thank you.
18	Okay. So we'll follow the agenda as
19	written. Any additional comments from Ed at this
20	time before we move?
21	MS. MARTIN: No. This is Jill Martin
22	again. I think we can proceed with state

1	comments that are common to both FY 20 and 21.
2	DIRECTOR MUHAMMAD: Okay. Thanks,
3	Jill and OGC.
4	Okay. At this point; again this is
5	Director Muhammad, I'm going to turn it over to
6	the state.
7	(No audible response.)
8	DIRECTOR MUHAMMAD: And whoever from
9	the state, if you're speaking, you may be muted.
10	MR. BROSNAN: This is Aaron Kramer
11	Brosnan with the New Mexico Public Education
12	Department. I think my partner was planning on
13	presenting, but there may be some technical
14	issues.
15	MS. MAUSKAPF: Are you able to hear me
16	now?
17	DIRECTOR MUHAMMAD: Yes.
18	MS. MAUSKAPF: Okay. Thank you. And
19	I apologize for the technical difficulties.
20	Good afternoon, and thank you, Aaron.
21	My name is Jennifer Mauskapf. I am
22	counsel on behalf of the New Mexico Public

Education Department and we do want to take the opportunity to respond to the comments from the LEAs, but before we go to some of the direct comments they provided we do want to provide a brief overview of the history and importance of equalization in the State of New Mexico.

First, though, we do need to address

-- there were many comments we heard making

allegations of submission -- data submitted by

the state as being inaccurate. We just -- we

strongly disagree with that and we just want it

to be clear that the state is totally committed

to a transparent and collaborative process.

We did address issues raised in the April determination, addressed issues raised in the request from the LEAs for the hearing that was submitted I believe on June 19th, and we also submitted -- responded to all the concerns raised by the Impact Aid Program in the June 29th letter.

We did ask for any issues or concerns raised by the LEAs requesting this hearing to be

shared in advance so that we could really do our best to make this time and hearing as productive as possible and be able to respond to those, but there were not additional issues provided through this process. So I just need to make it clear that the state is fully committed to ensuring that all data we have submitted is accurate and that we're transparent and that we are working together the best we can for this to be a collaborative and effective process.

With that I do want to turn to a little bit of an overview over equalization and its importance here in the State of New Mexico.

So across the United States in terms of state school finance programs all states do provide a share of total revenues available for public elementary and secondary education, although it varies widely across the country.

Now a key role of these state school finance programs has been diminished to a somewhat high degree of inequality in revenues per pupil that might result if funding were based only on local

taxable resources. Now that does -- as I mentioned, this varies greatly from state to state, but continuously New Mexico has fallen near the top of the list in terms of highest percentage of state share when it comes to school funding.

Now, prior to the enactment of the State Equalization Guarantee in 1974, schools were primarily funded locally with local property tax revenues resulting in a high degree of variance in school funding based on wealth. This in turn caused significant variances in access for opportunity. State education finance experts in the state recognize the reliance on local property tax wealth created a high degree of disequalization among the school districts and that's why in 1974 New Mexico passed the School Finance Act in part to help equalize public school funding.

New Mexico distributes most of its public school funding through the non-categorical SEG, the State Equalization Guarantee, which

maintains local autonomy -- which the districts maintains local autonomy in spending the funds.

The state's funding formula equalizes educational opportunity across the state by funding students based on individual need regardless of local wealth or geographical local considerations. The SEG is designed to ensure that districts do not need to rely on local property taxes to fund operational needs of their schools. As mentioned, the far majority of an LEA's general fund is provided through the SEG.

Now historically the SEG had been recognized as New Mexico's State Education

Program designed to equalize expenditures for free public education. During the initial FY 2020 certification process arguments were made that additional funds should be considered as part of the state aid program and be included in the disparity test. In April 2020 when IAP determined that the Capital Improvement Fund SB-9 tax revenues as well as certain other funds should be included in the disparity test, the

state then incorporated these additional revenues into the revised disparity submissions.

We additionally incorporated additional revenues that were subsequently pointed out by the LEAs in their request for the hearing and required by the IAP's letter dated June 29th.

With regard to SB-9 what's really critical here and is key to the -- making sure that there is a clear understanding of the revised disparity submissions is that it does function as an equalization program for school districts with lower tax revenues per weighted pupil and as such is considered within that computation of proportion.

In short, and I think the program did

a -- it was helpful for the program to explain a

little bit about the computation of proportion at

the outset, but sort of summed up the computation

of proportion requirement limits the degree to

which a certified state may consider impact aid

payments and requires that these determinations

be made on a case-by-case basis.

In our prehearing comments the state noted that we did apply the computation of proportion requirement as required by the Impact Aid Program in the revised disparity test submissions. And of particular note, because previously -- again previously only SEG had been being considered the disparity test -- in the disparity test; and there is that blanket limitation of 75 percent, the resulting proportion had historically been static. But now as a result of including the second equalization program in the analysis the computation of proportion can be expected to result in varying figures.

And when I turn it over to Aaron in a moment, he may address this, but as we noted in our prehearing comments this -- the only time a number less than 75 percent is applied is when it regards impact aid. Any resulting computation less than 75 percent is never applied against the half mil or any of the other funds. That has

always remained, including in these submissions, at 75 percent.

And I just want to emphasize that the state remains steadfast in our commitment to equalization and to ensuring transparency and collaboration throughout this process.

And so next I'll turn it over to Aaron

Kramer Brosnan who will go into more detail on

some of the specific issues raised today by the

LEAs in their comments.

MR. KRAMER BROSNAN: Okay. This is
Aaron Kramer Brosnan. I'm counsel for the New
Mexico Public Education Department. And as
Jennifer indicated I'll discuss some of the
arguments that were raised in previous letters
and in this hearing today.

I will note that there are some comments that we're seeing for the first time today. We will answer those in the course of the hearing as much as possible, but we anticipate needing to expand in post-hearing comments on issues that are being raised for the first time.

so roughly following the same format as the districts' presentation we'll address a couple things: So starting, one issue is around the idea of modeling changes to the status of charter schools. And so in New Mexico state charters are treated as independent LEAs which then for the sake of the disparity test means that they represent their own school district, while local charters are considered dependent on their local school district and therefore get folded into the LEA that that school district comprises.

I want to point out that here the key idea in -- when you look at 34 C.F.R. 222.161(b), the section that deals with data for determinations, the focus here is modeling is -- you're using the data from two fiscal years prior unless the Secretary determines the state has substantially revised its state aid program, in which case the state needs to provide data that shows that the new state aid program will still meet the disparity test.

Here the changes to the charter schools are not changes to the program of state aid, and so PED did model the changes that had been made as a result of K-5+ units, Extended Learning Time Programs, changes to size units and the staffing cost multiplier, which are the changes to how funds are distributed through the SEG.

The charter schools that either open or close in FY 21 still receive money based on this same funding formula. And so whether those need to be modeled or not is -- well, basically those don't need to be modeled because whether a charter school opens or closes, right, there are minor fluctuations in what schools are open or closed in any given year, but the way that those schools receive their state allocations remains the same.

And along those lines I'd like to kind of point out that if the state was required to constantly model the changes to what schools are in what district in any given year, the state

would run into a situation where the program of state aid; for example, the SEG formula, could remain in effect and unchanged for multiple years in a row and yet the state would end up being -- having to model small changes to charter schools every year.

The other one is -- this was briefly raised, the save harmless, the protection from program cost reductions, and so that was -- that's something that as of yet there haven't been save harmless payments made. And so currently the SEG -- any reduction to the SEG haven't triggered that statutory provision. And so since that provision hasn't been used, the state can't model a hold harmless that hasn't been distributed. So essentially there has been no change to any district on the basis of save harmless.

When it comes to yield control this is an issue that was raised last year in the predetermination hearing and I believe Ed had already addressed this issue. And so in the

State of New Mexico there's two acts that are going to govern taxation: There's the NMSA 25-8, which is the School Finance Act, which is -- determines what credits of the half mil levy, which is the local property tax for operating purposes, are factored into that district's allocation.

Then with that the amount of local property tax revenues that can be levied are then limited by the Taxation Act and -- under that, and so that's I believe 737 NMSA. And so under yield control there's a cap on how much property value may be considered in your property tax levy. And so when the state does -- when the state calculates its credit, it can only take credit for the taxes that the district is allowed to collect under state law, and that is reflected in our submissions. And so it -- the state cannot force a district to collect taxes in excess of the yield control statute and therefore that's the only amount that's credited.

And so if you look at the tax amounts

on table -- the local half mil levy tax amounts on table 5 of the state's submission, that shows what those tax receipts to the LEA would be subject to the yield control statute, and that's where the 75 percent credit is taken.

There was some discussion of taking credit for things like SB-9, and here is something where the state isn't -- the state statute that governs what funds are credited or not credited to the SEG is clear. And so something like SB-9 is part of an equalization program and the credits for SB-9 funds are taken within the context of that equalization program. And so that's the state match payment.

And as you can see from our disparity submission those revenues associated with the state match are included in the disparity test as well as the local property tax revenues raised. And where you can see the credits that are taken for the state match, that's that comparison in the disparity test of the program guarantee and then the corresponding SB-9 two mil levy. And as

Ed had recognized in its June 29th letter, the state would look at -- would determine the amount of credit by looking at the lesser of the program guarantee or the total local tax and that would give the credit.

Those credits are then factored in.

That goes directly to the computation of
proportion because the amount of SB-9 revenues
that the state takes credit for are included in
the numerator of that fraction along with the
amount of half mil levy. And then the
denominator of that fraction would be the total
SB-9 levies plus the total half mil levies.

This is unique from past years when SB-9 funds were not considered and the computation of proportion was limited to the half mil levy in SEG. And so there because SEG takes a flat 75 percent of all half mil levies, the computation of proportion, even though it was calculated individually, would always result in 75 percent.

Now with this year there's a variable

proportion and when we calculate that proportion on the basis of the SB-9 credits and half mil levy credits, that can result in proportions that range anywhere from under 75 percent to as high as 95% percent. And then as a result of that the state does need to follow its own state statute. And here then in order to comply with state statute the state applies a 75 percent cap on the amount of impact aid that may be considered in the SEG.

And then here that's one thing -- I know that discussion of the state law is meant to be outside the scope, but since it was raised in the comments from the district I feel it's important to address that briefly here. And so the state's interpretation of the 75 percent cap is consistent with state law. And there -- previously there was a state supreme court case that was brought by the Zuni Public School District which wanted to require PED to follow the requirements of Impact Aid in the timing of taking credits.

In that supreme court decision the New Mexico Supreme Court found that the requirements of Impact Aid were incorporated into the requirements of the School Finance Act. And so there they looked at the definition from 228.25 NMSA and found that 75 -- which says that 75 percent of grants from the Federal Government as assistance to those areas affected by federal activity authorized in accordance with Title 20 of the United States Code, commonly known as PL-874 funds, or impact aid.

And so therefore the state statute does consider that the -- it's 75 percent, but only up to the point where that would be authorized in accordance with Impact Aid. And there's additional commentary on that that we'll save and include in post-hearing comments if necessary. But in short, the way that the state has treated the 75 percent requirement for impact aid in state law is consistent with the state supreme court and with the state rules on statutory construction. And in allocating SEG

payments to districts in July and August after receiving permission from the Department of Ed to do so, the state has used the proportion that we indicated in our July 2020 submission that followed the computation of proportion provided by the Department of Ed on July 1st.

With that I would like to note that in the case of many districts including the four districts that have requested this hearing the allowed proportion of impact aid that could be considered under the federal regulations was far in excess of 75 percent, often times more, 95 percent. And that's where the state rather than following the maximum allowed under impact aid instead looked at the amount capped by the state law.

DIRECTOR MUHAMMAD: Okay.

MR. KRAMER BROSNAN: And then I believe that is the 15 minutes. I think we've covered most of what is I think common to both.

I believe that the districts have further things that we can discuss in later sessions.

1	DIRECTOR MUHAMMAD: Okay. Thank you.
2	This is Director Muhammad speaking again.
3	Ed, anyone from the Ed Team have any
4	comments at this point?
5	(No audible response.)
6	DIRECTOR MUHAMMAD: Okay. No
7	questions from OGC.
8	Amanda, on behalf of the program?
9	MS. OGNIBENE: I do not have any
10	questions at this time. I think we should just
11	move forward to the 2021 section.
12	DIRECTOR MUHAMMAD: Okay. One second.
13	Okay. All right. So at this point;
14	this is Director Muhammad speaking again, we're
15	going to listen to issues unique to fiscal year
16	21 and turn it over to the LEAs at this point.
17	MR. ROMINE: This is Martin Romine
18	again from Zuni Public School District. Can you
19	see my screen?
20	DIRECTOR MUHAMMAD: It looks like it's
21	getting ready to share, Martin. Not yet.
22	MS. OGNIBENE: Martin, just one

I think I need to make you a presenter 1 moment. 2 here. 3 MR. ROMINE: I'm on Jvanna's computer. 4 MS. OGNIBENE: Okay. I do see that you're trying to share your screen. We're not 5 seeing anything at the moment. 6 7 DIRECTOR MUHAMMAD: It's loading now. 8 Okay, Martin. You're good to go. 9 MR. ROMINE: As has happened with many 10 states throughout the country, New Mexico has seen significantly decreased revenues requiring 11 12 changes to the funding for schools for the '21 13 school year. 14 The legislature met in special session in late June and part of House Bill 1, which was 15 16 passed by the legislature, was a mandate that all 17 school districts would either have to participate 18 in the K-5+ Program, which adds 25 school days to 19 the year, or an Extended Learning Plan, which 20 would add 10 days to the school year. When the state submitted their 21 22 disparity analysis on July 20th, they modeled K-

5+ and they modeled Extended Learning, but they did not model the mandate from the state legislature. What they modeled were school districts that had the program in the 2019-2020 school year and had applied for funds when they submitted their budgets. Now virtually every student in the state will be mandated to attend a school that will have either an additional 10 or an additional 25 days added to the school year. That was not modeled in the submission and because of the number of days it will be a substantial difference in the money that will be allocated to each school district.

In addition, in the superintendent's

-- in the Secretary's call to superintendents on

August 17th it was made known to them that 10 of

the 25 days of the K-5+ Program could be waived

if they were in remote -- in a remote learning

environment. And on this August 24th call they

were asking -- or offering people the opportunity

to continue to amend their applications.

This is a substantial difference in

what was sent in the submission that the PED submitted to the state. It needs to be modeled. It needs to be figured in there, calculated in there so that people actually know what difference it will make to the state funding.

Let's see. I kind of explained that already. I kind of went -- got ahead of myself.

Got these slides already explained.

In reality when the state submitted their submission only 55 of 195 districts and charter schools were participating in the program. It modeled 107,342 of 326,661 student statewide. The K-5+ Program only modeled 24,266 of 326,661 students statewide. As you can see there are a lot of students that will now be participating in one or both of those programs that were not modeled in the state's submission.

In addition these two programs had the second largest budget increase in the 2019-20 school year. As you can see that justifies the need to have these programs modeled in the state's submission.

I'll save that for later. That's all that I have to say at this time for 2021.

MS. HANKS: This is Jvanna Hanks from the Gallup-McKinley County School District, and I guess I would like to talk about the CARES Act and just the methodology that's being utilized to actually credit those funds.

So the state is actually reducing state aid for the about 41 percent, I believe is what we've been told, of the CARES Act funding that we've received. Part of the issue there is that LEAs will be reduced upon the total amount that they have received even if some of those funds are actually proportionately shared with private schools.

I'm not sure what that credit actually does to our district. We have not been given that information, and so that information is not currently modeled as a legislative change for FY 21.

I would also like to ask -- so the state is -- has explained how the SB-9 crediting

1	works, and it's already been modeled they've
2	stated in the data that they've given. If we can
3	please be explained for the districts that are on
4	the line how much we were credited and how that
5	was done? I'm not sure if any of the other LEAs
6	have a question as well.
7	MS. CHAPPELLE: I have a number of
8	questions, but I'm going to wait to this is
9	Germaine Chappelle; my apologies until the
10	end, Jvanna, of your comments, but I do share
11	that question and concern and it confused me.
12	DIRECTOR MUHAMMAD: Who was speaking
13	just now, please? This is Director Muhammad.
14	Please identify yourself.
14 15	Please identify yourself. MS. CHAPPELLE: I did, Director.
15	MS. CHAPPELLE: I did, Director.
15 16	MS. CHAPPELLE: I did, Director. Germaine Chappelle.
15 16 17	MS. CHAPPELLE: I did, Director. Germaine Chappelle. DIRECTOR MUHAMMAD: Okay. No, someone
15 16 17 18	MS. CHAPPELLE: I did, Director. Germaine Chappelle. DIRECTOR MUHAMMAD: Okay. No, someone else spoke I thought after you.
15 16 17 18 19	MS. CHAPPELLE: I did, Director. Germaine Chappelle. DIRECTOR MUHAMMAD: Okay. No, someone else spoke I thought after you. MR. CHAPPELLE: Oh, my apologies.

MR. SANCHEZ: This is Andrew Sanchez, 1 2 Madam Director, and -- of course for Gallup-McKinley, Grants-Cibola and Zuni Public Schools. 3 Counsel for the PED, while --4 5 indicating that somehow that the argument about how they reinterpreted the statute is relevant 6 7 needs to have some sort of comment. The idea or the PED coming up with the 8 9 new interpretation of 228.25 is a recent development. In fact, this idea of a 75 percent 10 cap has made its first appearance ever in 11 12 response to the TRO. If you look again -- and I make 13 reference to Jvanna's slides on No. 8 and No. 9. 14 15 These denote that the PED has in the past and 16 including for this school year, including fiscal 17 year 2021, has never deviated from the statutory 18 language, which I'm referring to is 228.25(d), 19 subsections 5 and 6, which has the word shall 20 take 75 percent of those revenues. 21 What the PED has been arguing now, and

this goes towards the accuracy of this data for

2021 -- is arguing that they can now do this sliding proportional scale because they have no reinterpreted state law to allow them to take in accordance with federal law this leap, which can only be characterized as a leap, that they can adopt these aspects of 7009 and of the regulations and of the disparity tests and incorporate them into state law. I think that that goes towards this accuracy of this information. That -- the statute has a shall and they can't get past it.

The Zuni case; and I do urge OGC to look at that, the application of the New Mexico Supreme Court in that case was simply to use federal law as when state law would be triggered. The case stands for -- the only holding is that the state may not take impact aid credits under the SEG until this Agency certifies that the funding, the entire funding formula has been equalized. It stands for no other assumption.

And the reason why I'm bringing this up is that the argument that if there's a

conflict between federal law and state law, preemption applies. And that means that we must follow the federal law. There is no conflict here because I think that, as Jvanna has indicated earlier, there is nothing in your applicable law that tells the states how to fund public schools. There is nothing in 7009 or in the regulations that say the state must fund public school in this manner. All it requires is that it must be able to do it and be equalized for equitable purposes with regards to the taking of federal funds that have been awarded to these — the school districts that qualify.

So that needs to be very much clarified and that -- in other words, the comments of the PED cannot stand alone of this newfound interpretation of state law. And then certainly again I refer the Agency that this matter will be addressed by a state court who will do the job of interpreting state law.

So we do ask that that not be blanketly accepted, the PED's submission be

blanketly accepted that they are in fact 1 2 providing accurate information. DIRECTOR MUHAMMAD: Okay. This is Ms. 3 4 Muhammad speaking again. Any other comment from 5 any of the LEAs? Yes, Director. 6 MS. CHAPPELLE: This 7 is Germaine Chappelle. I'm wanting to follow up 8 as well. 9 DIRECTOR MUHAMMAD: Yes, ma'am, go 10 ahead. 11 MS. CHAPPELLE: Thank you. 12 So, in line with Mr. Sanchez' 13 comments, I do want to -- have a few follow-up, 14 but I also want to just kind of conclude some of the comments and piece them out of that, made by 15 16 both Jvanna and Martin. 17 And with respect to 2021, I think the 18 point that Mr. Sanchez made earlier in this 19 hearing, about the pending restraining order, is 20 pertinent. In that restraining order the judge 21 indicated it does not believe the -- or, at least

for right now, there's a hearing later this week

-- that the state can submit this current methodology, given the status of state law.

And so I just want to point out,

Director, that is an ongoing concern and an open
issue that I think we probably will have to
address, with respect to this 2021 formula and
methodology.

You know, we've heard some references to state statute. We've heard some references, obviously, to the federal law and the notion of preemption. And I just kind of want to take us back to the basics for a minute. Federal law, as we all know, and on this particular topic, is not mandatory, it's an option. So, if states want to take the option, they then have to meet certain standards.

As we all know, less than, I believe, four states, three or four states, right, have availed themselves of this option.

With respect to the state and the state's public education department, they are obviously a part of the executive branch. And as

part of the executive branch, they can only act pursuant to authority granted to them by the legislature.

I'm in absolute agreement with Mr.

Sanchez and the analysis put forth by Ms. Hanks
and Mr. Romine, in that the current status of the
statute does not contain any language whatsoever
to communicate or convey the intention of the
task force with true language. If you look at
other places in the statute, when the legislature
intends to have a sliding scale, with respect to
that, it absolutely uses, up to, or, cap, it does
not use, shall or mandatory.

I'd also like to point out, and I won't belabor this point because we will include it in our briefing, that if the percentage language is actually implemented because the state will decide to treat the percentage taken from impact aid differently from the percentage taken from other local revenue. And it's that history that also says to me that this notion of the 75 percent being a cap is inaccurate.

Moving forward from that argument, I also am of the view that the proportionality methodology, the methodology actually violates state law on some other principles. And with respect to the state constitution, as we all know from Yazzie/Martinez, the state is required to provide equal access to students to education.

The proportionality methodology, as applied, clearly by the demonstratives showed by Mr. Romine, does not do that. In fact, it actually indicates that the most wealthy schools are excluded in the top 25 percent, and the least funded schools are, obviously, at the bottom, one of those being the impact aid district with less than 1 percent private property tax availability. My understanding is they can collect maybe \$1,000 a year in that local proportionately match.

So, as applied, and given New Mexico's unique tax structure, we do not believe that the current formula provided by the state for 2021 is consistent with the New Mexico constitution.

Frankly, the formula that they have

provided is not ripe for review. And the bottom line reason for that is the legislature has not authorized PED to put forth this formula. And in our analysis, the executive does not have that within the executive discretionary powers to implement that.

And with respect to preemption, for the reasons already discussed, in order to comply with federal law, the state also has to comply with state law. Preemption does not apply here because this is a discretionary action; the state opts into this program, it's not required to conduct itself in that program.

I also encourage OGC to take a detailed look at the Zuni case referred to by PED's counsel. That is an apples to oranges analysis when that was provided. The issue being raised in that case is not the issue that we are discussing today. And so, at the very least that analysis is dicta. But I don't -- I don't even think it's dicta, I think it's apples to oranges.

And -- I'm just going through my

notes. I think Mr. Sanchez covered a number of things.

I did want to quickly respond,

Director and parties, to the state's recitation

of the background of equalization. I realize

that that was probably outside the scope of what

we were asked to present today. But I do think

it is very important to discuss. And that is

because the state, from a demographic standpoint,

is very diverse.

The central part of the state and the southeast and northwest corners, by and large, are pretty productive, meaning there is industry and there is business and there are fairly decent property tax revenues coming out of those localities.

On the other hand, for the most part, with a few exceptions, the northeast and southwest corners of the state neither contribute significantly through severance taxes, property taxes, or impact aid. And so, in the 70s, and I apologize, Ms. Mauskapf, for saying your name

incorrectly -- she is absolutely correct, the state had a problem on how it was going to fund schools in a fairly equalized manner.

Like I mentioned, the southeast and northwest contribute quite a bit, actually, in both industry, and impact aid, and property taxes to the overall school formula, but those other two corners did not. And so, the state really did need to find a way to deal with that.

Unfortunately, and as we discussed last year, and we will raise again in response to the state's 2020 methodology submittal, the per student contribution is skewed, and it still is skewed even under the proportionality test such that Zuni children, for example, contribute about 3500 per student, CCSD is at about 2500, and then, of course, Gallup is at about 1500. The rest of the state is between for the most part \$50 and \$200 per student in terms of this 75 percent percentage into the overall pot.

The reason I think that's important is because we -- we obviously have a problem in

school funding in New Mexico. Unfortunately, the formula that the state has put forth actually creates wider disparity on the ground, than it does seeking to actually fix the problem.

And I would note, from the CCSD perspective, we are in jeopardy of losing 80 percent of our property tax revenue due to the closure or scheduled closure of two major industrial complexes in our school districts. What that means is, if the proportionality test or formula is applied, we will be sitting right next to Zuni, with respect to those funding problems, because our percentage of property tax revenues, like I said, will have dropped by 80 percent.

And with that, I stand for questions.

MS. MARTIN: I do have a question, if
that's okay with the Impact Aid Program. This is
Jill Martin again from OGC, from Office of
General Counsel.

DIRECTOR MUHAMMAD: Yes, Jill.

MS. MARTIN: Okay. So, I just want to

clarify what was just said. Because the proportion calculation only affects the amount of impact aid that a state may take into account, and it only affects school districts that receive impact aid.

In other words the federal law says, you can't take more impact aid into account, state, than the percentage that local taxes covered under the equalization program are to total local taxes. That's the proportion. And that only affects impact aid and only affects the districts that received impact aid.

So, what that means for New Mexico is that some impact aid districts will get more state aid and get to keep more impact aid. Not all impact aid districts in New Mexico will get to keep more impact aid, due to a lower proportion, because under the data submitted by the state it shows that some districts will still have to have 75 percent of impact aid taken into account. And that doesn't affect, you know, the local amount taken, as we heard from the state.

But what confuses me is -- I'm a little confused because of the appearance that the four districts that have asked for the hearing are apparently objecting to the state taking the lower amount of impact aid from impact aid districts and letting them keep more impact aid. The state is saying they will comply with the federal regulations and apply that lower percentage, even though it hurts state revenues because they have to come up with more state money.

I think that that's the result, as I see it. And I was curious -- you don't have to answer now, you can do it in your written comments -- but if there's any response from the point of view of the districts about that appearance of why that opposition should be.

And just to also clarify one thing that was said by Ms. Chappelle, about equalization being optional, it is true, a state does not have to apply for certification for Section 709. But, if it does, it must comply

with federal regulations. So, New Mexico has applied and, therefore, it does have to follow all of our impact aid regulations.

And if there is a regulation under the federal law that is different from state law, then that's where the preemption comes in. So, I just wanted to clarify that. Thank you.

MS. CHAPPELLE: Yes, if I might respond real quick, Director?

DIRECTOR MUHAMMAD: Yes. This is -- go ahead. Go ahead, Ms. Chappelle.

MS. CHAPPELLE: Thank you. My -Thank you.

so, I think the question you're raising really gets to the heart of our concerns. And that is that when you take a district, like Zuni, for example, that has very little private property tax and, therefore, you know, de minimis ability to raise property or tax revenue locally, this methodology does absolutely nothing to help that school district. The data from the state indicates that Zuni will still be at 75 percent.

And so that's what seems inapposite with respect to how this particular formula, as applied, taking into consideration New Mexico's tax structure, doesn't seem to actually, I guess, implement the policy and the reason behind having the formula with this option for equalization in the first place.

And so that's what the heart is, and we will definitely brief that further so that we can clear up that confusion. And I do appreciate you, you know, bringing that to our attention, because that is, you are absolutely right, the crux of the issue.

And from a preemption standpoint, once
the state has decided to avail itself of this
option, even after doing that, it still has
options in terms of what particular formulas it
puts forth. Right? And so, from that
perspective, and even under a preemption
analysis, state law can be more restrictive in
making sure they're, obviously, consistent with

the federal law. 1 2 In this particular situation a state agency is acting ultra vires of the authority it 3 4 has, because right now the legislature has not authorized it to utilize this particular sliding 5 or proportionality formula. And that's the 6 concern we have, just as a threshold issue. 7 8 MR. SANCHEZ: Ms. Martin, this is 9 Andrew Sanchez; if I may, Madam Director? 10 DIRECTOR MUHAMMAD: Okay. Just one second, Mr. Sanchez. 11 12 Have we heard all comments from the 13 LEAs? And, if so, I will turn it over to Mr. 14 Sanchez from the state. Again, this is Director 15 Muhammad speaking. 16 MR. SANCHEZ: Madam Director, I'm not with the state --17 18 (Simultaneous speaking.) 19 MR. SANCHEZ: I'm not with the state. I'm with the three school districts. 20 21 DIRECTOR MUHAMMAD: Oh, okay. 22 apologize. Okay. Yes, go ahead.

MR. SANCHEZ: I think that on a more fundamental level is what we've been arguing here, and I think it can even be reviewed and simplified even more, Ms. Martin.

The formula that you have been given by the PED is not based on reality. It is them satisfying the requirements of whatever disparity test that they are doing. But what they are doing is they are reflecting that there is a sliding scale, as you mentioned, of impact aid, and that, in fact, under their formula, the school districts would receive -- would not be subject to as much of the credits with regards to that.

The crux of this whole thing is that that's not reality. For this school year, and the budgets that were approved, the PED did exactly what the statute requires, which is you shall take 75 percent. That is why we are arguing, with regards to the accuracy of this data, is that they are, they are contending that there is this other parallel funding formula that

is in existence in how they fund public schools.

That is not, in fact, reality. The budgets that were approved and the credits that were taken were consistent with 22.8.25 as written in the statute. The idea of this data that's being submitted to the PED as being, this is how we need to fund public schools, is not accurate.

That's what the TRO was about, was to try to get the PED to require that the data that they supplied to this agency be rooted in the actual way, and depict how, schools are actually funded.

Like I said before, the first time
we've ever heard of this 25 percent cap in the
sliding proportionality scale was in response to
the TRO. It doesn't exist as set forth in slides
8 and 9 of Ms. Hanks' presentation. There has
never been a presentation to our legislature
about this. There has never been any attempt by
the PED to say that the budgets need to be
adjusted, pursuant to this proportionality,

because it doesn't exist in reality.

That is the crux of the accuracy challenge that the LEAs are making today, is that there has been data submitted to fulfill nothing more than to pass a disparity test to get the certification. But that's not how schools are funded.

DIRECTOR MUHAMMAD: Okay, thank you.

Again, this is Director Muhammad.

Any other comments? If not, I'm going to turn it over to the state for comments that are unique to school year 21 at this point.

Okay.

MR. BROSNAN: Okay. This is Aaron
Kramer Brosnan again, counsel for the New Mexico
Public Education Department.

So, a couple of things here. And, one, I'd like to ask -- if it's okay, I'd like to take a little extra time. I think there's some confusion over how proportionality was calculated and operated. And if you don't mind allowing us a little extra time, I think it would be helpful

1	to walk through that issue, Director Muhammad.
2	DIRECTOR MUHAMMAD: Yes. Why don't
3	you go ahead and get started, yes.
4	MR. BROSNAN: Okay. So
5	MS. CHAPPELLE: I'd like to make a
6	clarification, Director Muhammad.
7	We left out quite a bit of our
8	analysis on the, kind of, bullet point findings
9	we made. So, if the state does that, we would
LO	like the ability to be able to respond with a
L1	table.
L2	DIRECTOR MUHAMMAD: Duly noted. We'll
L2 L3	DIRECTOR MUHAMMAD: Duly noted. We'll try to stay within the time frame. I'll give the
	_
L3	try to stay within the time frame. I'll give the
L3 L4	try to stay within the time frame. I'll give the state the time that's allotted and maybe a few
L3 L4 L5	try to stay within the time frame. I'll give the state the time that's allotted and maybe a few minutes. So, yes.
L3 L4 L5 L6	try to stay within the time frame. I'll give the state the time that's allotted and maybe a few minutes. So, yes. And don't forget, everyone, that
L3 L4 L5 L6	try to stay within the time frame. I'll give the state the time that's allotted and maybe a few minutes. So, yes. And don't forget, everyone, that you'll be able to submit additional documentation
L3 L4 L5 L6 L7	try to stay within the time frame. I'll give the state the time that's allotted and maybe a few minutes. So, yes. And don't forget, everyone, that you'll be able to submit additional documentation in writing, also. But noted. Thank you.
L3 L4 L5 L6 L7	try to stay within the time frame. I'll give the state the time that's allotted and maybe a few minutes. So, yes. And don't forget, everyone, that you'll be able to submit additional documentation in writing, also. But noted. Thank you. MS. CHAPPELLE: Thank you, Director.

you know, inaccuracies.

The temporary restraining order didn't prevent PED from submitting information to the Department of Ed, it just asked that it be accurate, which we do believe and stand by strongly that the data we have is in fact accurate.

And along those lines -- so, when it comes to the timing of this cap issue, I think it's important to note that prior to the April determination the credit could only be 75 percent because of the limitations in crediting the half mil levy. And so, this is new because of changes required by the department in the April determination letter.

And, you know -- and so what I want to note here is that the state is applying the most restrictive rule for each LEA. So, in instances where Ed would allow a greater proportion, but the state would allow a lesser, then we're going with the lesser proportion required under state law.

In instances where the state would allow a larger proportion, but the department's regulations require a smaller proportion, we follow the more restrictive in that case, which is the federal regulations.

So, what the state is doing, to harmonize these two statutes and the requirement of the two, is that we're always applying the most restrictive rule, and the rule that is least favorable to the state.

In terms of if you look at -- and so along those lines if you look at table 5 of the July 2020 revised FY 21 disparity submission, table 5 lays out the computation of proportion for each district. And what you'll see is for each district we took the half mil 75 percent credit, and the SB-9 property tax is considered in the calculation of the SB-9 state match. And then we divided that by the total of those two local property taxes.

And if you look, for example, at Central on the first page of that table, Central

Consolidated School District, that is, we would - the state would be allowed to take a proportion
of 95 percent under federal impact aid
regulations. However, rather than taking that 95
percent, because that would conflict with state
law, PED reduced the credits taken to 75 percent.

And so, the SEG allocations made this year for Central Consolidated reflect the same 75 percent that's been taken historically, because, instead of using the 95 percent proportion allowed under federal regulations, we used the 75 percent portion allowed under the state law.

If you look at Gallup-McKinley County Schools, the state could take 95.5 percent credit under the impact aid regulations. However, to comply with state law, we reduced that to 75 percent, taking the option that was worse for the state.

For Grants and Cibola County schools, it was 95.32 percent. These are all Column E versus Column F, which we capped at 75 percent.

And then, finally, for Zuni Public

School District, impact aid regulations allow a proportion of up to 94.49 percent, which we capped at the maximum 75 percent allowed under state law.

And so, if we were not to use the more restrictive of the two pools, and instead we were to follow the federal regulations, as required -- as Ms. Martin has indicated would be required under preemption, then the districts would each lose an additional, approximately, 20 percent of impact aid funding to the formula.

And that's something I think we had mentioned that this was outside the scope, but I think it's worth mentioning, I think Ed has dealt with in the past, but this is a test of disparity. And the amount of contributions isn't at issue as long as, using the formula provided for in the federal regulations, the state meets the disparity test, which is true in this case.

And so, you know, while we understand that there may be concerns over the amount of credit that the state is taking, those concerns

are beyond the scope of this hearing.

For some other issues, as it relates to CARES Act, and so here the state recognizes that CARES Act is flowing to school districts, and so here the state reduced the total SEG -- the state legislature reduced the total SEG allocation. As a result, PED had to reduce the unit value, and so the amount of funding that gets distributed per student through the SEG.

But the legislature did not change how that funding flows to schools. And so, it serves as a blanket 1.2 percent reduction in every school district's SEG allocation, but it does not change how that money is distributed.

And so here it's not actually a change to the program of state aid, it's simply a change in the amount of funding made available to distribute through the program of state aid.

When it comes to the K-5 plot and extended learning time, here I just want to note that it's inaccurate that this is a requirement. The legislature, in their special session,

indicated that they strongly encouraged school district participate in the K-5+ and extended learning time programs. And if a district chooses not to participate in those programs, then they need to provide an explanation to PED of what activities they plan to offer instead to make up for learning time lost to the pandemic.

Here, the way that these funds are distributed, the formula that determines the units assigned for K-5+ and extended learning time are the same -- it's the same methodology that was indicated in the modeling that we provided.

And as the districts note, they're -you know, not 100 percent of the funding
available to those two programs was distributed,
in large part because, since they are voluntary,
and they require that teachers and students go to
an extra 25 -- 10 to 25 days of school, it's very
difficult for school districts to adopt those
programs, and there's large amounts of resistance
from local programs.

And so, you know, here we don't know what districts will or will not choose to participate, and if districts are going to require staff to stay and teach an additional 10 to 25 years, or if parents are going to support that provision.

I also want to note that we modeled on the data we had for districts that chose to participate when we submitted the July 2020 submission. And I'll note that because this is projected data, the state does have to submit final data at the end of fiscal year 21 that will reflect the total number of districts that choose to participate in K-5 and extended And if in the event the learning time programs. schools that participate cause the disparity percentage in the state to increase more than 11 percentage points, to put us over the 25 percent threshold, we have signed that assurance that indicates that we will return the state aid payments that were improperly withheld.

And so, the K-5+, both will be dealt

with on the back end, and also does reflect the modeling we could do at the time, because until districts choose to participate in that program, there's no way to allocate them funds.

With -- there was some discussion -- So, also, the Yazzie/Martinez issue was one that I'd like to address.

So, here, the state indicated in its legal opinion that the structure of the funding formula remained the same. The issue in the Yazzie/Martinez case is that not enough money went to students who were identified as at-risk. And the court had indicated -- or, shown that it believed that the extended learning time, and K-5+ programs, and the at-risk units were the most appropriate ways to address those issues

And so, the state, keeping the exact same School Finance Act, which is still very much in place as it was before, then added the K-5+ extended learning time programs to the SEG. And so, instead of being pilot programs, they are now permanent features of the school finance formula,

which are changes that we modeled in the FY 21 submission.

Then, also, it increased the at-risk multiplier from, previously, that multiplier was 0.16 and now has been increased to 0.3. And that change has also been modeled in the submission.

And so the state aid formulas is -has been changed, and the weights that are
associated with at risk, K-5+, and extended
learning time have changed. But, all of those
changes have already been modeled in the current
submissions.

There were some other issues, related to proportion, in that a requirement that the state has to provide equal access. And, again, I think that is outside the scope of the disparity test.

And so the disparity test isn't looking at exactly how much money goes to every school, and it's not a test of adequacy of funding, it is instead a test of, does the state -- the program of state aid serve to equalize

1	expenditures between the 95th and the 5th
2	percentile school? And our submission does show
3	that the state formula does in fact equalize, and
4	equalize well, to an extent that is well below
5	the 25 percent threshold required.
6	And so I believe that's covered the
7	majority. You know, I would ask if the
8	Department has any questions that they would like
9	us to clarify. I think I m returning a couple
LO	minutes of time to you.
L1	MS. OGNIBENE: I think we might be
L2	having some technical issues with our chairman.
L3	But I will
L 4	DIRECTOR MUHAMMAD: I'm back.
L 5	MS. OGNIBENE: Oh, you're back? Okay,
L6	great.
L 7	DIRECTOR MUHAMMAD: Thank you. Okay.
L8	And thanks, everyone, for any and all technology
L9	issues, knowing that we're all working from
20	different locations today.
21	So, I am I am back on.
22	Okay, so again this is Director

1	Muhammad. Any other comments from the state at
2	this point?
3	MR. BROSNAN: We have no further
4	comments on FY 21. We're just open for
5	questions.
6	DIRECTOR MUHAMMAD: Okay, thank you.
7	MR. BROSNAN: This is Aaron Kramer
8	Brosnan from the New Mexico Department of
9	Education.
10	DIRECTOR MUHAMMAD: Thank you.
11	Okay, any comments from OGC?
12	MS. MARTIN: No, but I believe Amanda
13	has a couple questions.
14	DIRECTOR MUHAMMAD: Okay. I'll turn
15	it over to my senior analyst, Amanda. Go ahead.
16	MS. OGNIBENE: Hi, everyone. This is
17	Amanda Ognibene with the Impact Aid Program. I
18	do just want to ask some clarifying questions
19	just to make sure that we are on the same page.
20	So, you stated before that the state
21	is using the proportion calculation that factors
22	in the SB-9 minimum when they are making their FY

	21 estimated payments, correct?
2	MR. BROSNAN: That is correct.
3	MS. OGNIBENE: Okay, great.
4	And I also just want to confirm the
5	impact of including ESSER funds, or factoring
6	that into the SEG payments. That has reduced the
7	overall unit value by 1.2 percent. And that
8	otherwise there is is there not a change to
9	the state equalization guarantee, in terms of how
10	it is calculated?
11	MR. BROSNAN: That's correct. It was
12	the unit value reduction was approximately
13	1.52 percent. And that ends up that is just
14	applied universally to all LEAs. It didn't
15	change the actual formula that is outlined in
16	25.825.
17	MS. OGNIBENE: Great.
18	And I also just want to clarify for
19	everyone that when I'm talking about CARES Act, I
20	mean the ESSER funds that others have brought up.
21	DIRECTOR MUHAMMAD: Okay.
22	MS. HANKS: This is Jvanna Hanks from

Gallup-McKinley. May I ask two questions? 1 2 DIRECTOR MUHAMMAD: Yes, Jvanna, go ahead. 3 4 MS. HANKS: So, number one, the CARES 5 Act, so the reduction in SEG -- so the CARES Act then should be modeled in the FY 21, correct? 6 7 The total amount that LEAs received? 8 Well, I mean, that's, MS. OGNIBENE: 9 that's another issue. We would have to look at that in terms of, you know, what is the actual 10 11 impact from the formula, versus -- because, I mean, the state is doing a disparity test on an 12 13 inclusion basis now, which means that revenues 14 for all districts are being added together and divided by their weighted student count. 15 16 So, it's an open question. We're just 17 we're trying to clarify right now what exactly 18 the impact was, and figure out whether that needs 19 to be included in the model. 20 DIRECTOR MUHAMMAD: And this is 21 Director Muhammad speaking. And that's something we can circle back with. 22

MS. HANKS: Sure. Yeah. And that will probably be part of our written comments as well.

We received the email on Friday. And I know it was mentioned earlier by Mr. Brosnan, I believe, that, you know, there were some issues being brought up that hadn't been discussed before.

Some of the information that was sent to us on Friday we haven't seen before. So, I think that's part of the collaborative effort.

And then also just revenue methodology on the inclusion method, which is a difference from the prior methods that were being utilized. So, we're going to have to go back and re-analyze all the funding sources that we may have excluded due to the exclusion method being utilized.

So, please anticipate that in our written comments as well.

And then just my other question that I had asked, if someone can please tell me what my SB-9 credit was?

So, I'd like to comment 1 MR. BROSNAN: 2 on the previous question, briefly. That, you know, the state understands 3 4 from correspondence in previous years that 5 typically a increase or a reduction in the amount of funding without a corresponding change in the 6 7 way units are generated and the formula is 8 distributed, is not a change that needs to be 9 modeled. The focus is on the changes to the actual program of state aid, rather than the 10 allocation for state aid. 11 12 DIRECTOR MUHAMMAD: And please 13 identify yourself once again for the record. Sorry. This is Aaron 14 MR. BROSNAN: Kramer Brosnan of NMPED. 15 16 DIRECTOR MUHAMMAD: Thank you. 17 MS. HANKS: This is Jvanna Hanks from 18 Gallup-McKinley. 19 And, Mr. Brosnan, I appreciate what 20 you're stating. But when the legislature 21 approved that funding, they specifically put the 22 CARES Act as a crediting line item. So, it is

specifically changing the way that funds are being distributed.

MS. MARTIN: This is Jill Martin from Office of General Counsel in the Education Department.

I do have one follow-up question, Mr. Brosnan, for what you were saying about the CARES Act allocations. You did say that there was no change to the state aid formula. But, does that mean for the FY 21 funding -- and I think this is what Amanda's question was getting at, also -- for the funding that you are currently giving out, is there a change -- is it a direct match that for each CARES Act dollar, they get less state aid -- they get less state aid, so the total is exactly the same? Or is it not a one-to-one direct match?

MR. BROSNAN: That's a good question.

I think a point of clarification here is that the legislature isn't looking at a district's allocation of CARES money. They -- the districts -- or, sorry, the legislature recognized that

CARES Act money will be going to districts and, therefore, reduced the entire SEG allocation that would be distributed to schools on the basis of the SEG formula.

And so, the credit isn't -- is not done like impact aid, where it's done on a case by case basis for districts that receive impact aid, it's different in that that funding source is just being used to reduce the total pot of SEG funds available to be distributed through the state formula.

MS. HANKS: So, I'm sorry, this is

Jvanna Hanks again. So, point of clarification.

The school district is being reduced on the basis of the total CARES Act funding percentages, but we're having to proportionately share out some of those funds to private schools, in which the crediting does not apply. So, there will be a disequalization between school districts on the amount that's credited to them.

DIRECTOR MUHAMMAD: Thank you. Thank you. Any additional comments from the

	department?
2	MR. BROSNAN: No. We don't have any
3	additional comments. And, of course, we're
4	always willing to submit any modeling that the
5	Department believes should be required.
6	MS. HANKS: And, I'm sorry, this is
7	Jvanna hanks from Gallup-McKinley again. If
8	somebody can just please tell me the amount that
9	was credited from the SB-9 dollars?
LO	MR. BROSNAN: This is go ahead.
L1	Sorry, Director.
L2	DIRECTOR MUHAMMAD: No, go ahead. Go
L3	ahead. And please identify yourself. Go ahead.
L 4	MR. BROSNAN: This is Aaron Kramer
L5	Brosnan from the New Mexico Public Education
L6	Department.
L7	I believe, and forgive me, I don't
L8	have the date off the top of my head, but I
L9	believe that the state has already provided a
20	memorandum to each LEA in the state outlining the
21	1.52 percent reduction in unit value.

MS. HANKS: No, I'm sorry, I just want

1	to know what my credit was for the SB-9 dollars.
2	This is Jvanna Hanks.
3	MS. MAUSKAPF: This is Jennifer
4	Mauskapf from the New Mexico Public Education
5	Department.
6	Ms. Hanks, I just want to make sure we
7	understand your question. Do you understand that
8	computational proportion is somehow being applied
9	to SB-9 and credit being taken?
10	MS. HANKS: This is Jvanna Hanks. I'm
11	sorry. Should it not be? Because that is a
12	local revenue off of property taxes.
13	MS. MAUSKAPF: And I know that's an
14	argument that I heard you all make earlier, and I
15	believe Mr. Kramer Brosnan addressed that in our
16	prior comments.
17	MS. HANKS: So, to be clear, there is
18	no credit of SB-9 dollars? This is Jvanna Hanks.
19	MR. BROSNAN: This is Aaron Kramer
20	Brosnan, NMPED.
21	All of the information for the
22	calculation of the SB-9 program in the context of

the required computational proportion under the 1 2 federal regulations is on table 5 of our FY 2020 21 disparity submissions. 3 and FY MS. HANKS: I'm sorry, this is Jvanna 4 Hanks, so -- from Gallup-McKinley. 5 And I just want to be clear, because 6 7 this is the discussion we're having, there is no crediting currently of SB-9 dollars happening? 8 9 MS. MARTIN: Can I just suggest something? Hi, this is Jill Martin again from 10 Office of General Counsel. 11 12 I think there may be confusion -- I 13 know there is in my mind -- as to what is meant 14 by the question crediting of SB-9. Because we understand that the SB-9 program functions as its 15 16 own type of equalization program in that the 17 amount of state funding of SB-9 is dependent in 18 part on the local amount. 19 So, I'm not sure if you're referring 20 to that, or if you're referring to something that 21 is related to the disparity test, or to the

proportion which we were discussing that only

1	affects impact aid. And I'm not sure what the
2	question is directed to.
3	Thanks.
4	MS. HANKS: Sorry. This is Jvanna
5	Hanks again.
6	I think that, probably, our written
7	comments will look at this, and it is speaking
8	to, actually, all three of those things that
9	you've mentioned.
10	DIRECTOR MUHAMMAD: Okay. This is
11	Director Muhammad speaking.
12	Thank you. And the written comments
13	will be helpful, because it seems everyone has a
14	question about the question. So, thank you.
15	MS. CHAPPELLE: Director Muhammad,
16	this is Germaine. I do have a quick question for
17	Mr. Brosnan, if that would be okay?
18	DIRECTOR MUHAMMAD: Yes, go ahead.
19	MS. CHAPPELLE: Thank you.
20	Mr. Brosnan, I thought I heard you say
21	that under the proportionality methodology the
22	state was still going to keep 75 percent across

1	the board. Is that did I take did I get
2	that wrong? Did I confuse that?
3	MR. BROSNAN: This is Aaron Kramer
4	Brosnan with the New Mexico Public Education
5	Department.
6	That is not accurate. And so it
7	happens that for CCSD, Gallup-McKinley, Grants
8	and Cibola, and Zuni School Districts that the
9	proportion is capped at that 75 percent amount.
10	But the amount that we do take credit for varies
11	by district, according to the table 5.
12	MS. CHAPPELLE: And you're speaking
13	this is Germaine Chappelle again, my apologies
14	about the 2021 submission?
15	MR. BROSNAN: We did use Ed's
16	proportionality we did update the
17	proportionality methodology in both submissions.
18	MS. CHAPPELLE: And just to be clear,
19	right, prior to this, it had been a straight 75
20	percent for a couple of decades across the board.
21	I just want to make I was just a
22	little bit confused by what you said earlier

about that percentage.

MR. BROSNAN: This is Aaron Kramer
Brosnan, New Mexico Public Education Department.

That is correct. Prior to the April 15th, 2020 determination letter from the Impact Aid Program, the only local tax revenue used in the computation of proportion was the half mil levy, which is a flat 75 percent across all districts in the state.

After that determination letter, when SB-9 local tax revenues were required to be considered in the computational proportion, the state updated its methodology to comply.

MS. CHAPPELLE: Okay. Director Muhammad, this is Germaine Chappelle again.

And so obviously we clearly have a disagreement about the interpretation of law, as between LEAs and the state. And so I don't -- I don't want to belabor that. I know we have another subject matter to get into, and so I will, pause my comments simply into that.

Thank you, Director.

1	DIRECTOR MUHAMMAD: Thank you. Okay,
2	and this is Director Muhammad.
3	We're going to move on to issues
4	unique to fiscal year 2020. So, I will turn it
5	back over to the LEAs for comment.
6	Okay. Any comments from the LEAs that
7	are unique to 2020?
8	MS. CHAPPELLE: Director, this is
9	Germaine Chappelle again.
10	We are a little confused by what you
11	mean by unique to 2020.
12	DIRECTOR MUHAMMAD: So, are there any
13	questions related to that haven't been
14	discussed thus far in the initial comments that
15	were similar to that crossed both years that
16	are unique to fiscal year 2020, regarding the
17	data?
18	We've discussed the lines so far
19	overall, but I just want to give you, the LEA, a
20	moment to discuss anything that is unique to
21	fiscal year 2020.
22	MS. CHAPPELLE: Director Muhammad, I

would like to reserve our discussion of that for 1 2 the written briefing. You know, we have addressed those issues both in last year's 3 4 hearing, obviously, and now there's carryover in 5 our submittal initially regarding some of those So, that would be my preference, for 6 concerns. 7 CCSD. 8 DIRECTOR MUHAMMAD: Okay. 9 MS. CHAPPELLE: I do have some closing 10 arguments, as I mentioned in the beginning, that 11 I would like to make at the appropriate time. 12 Thank you. 13 DIRECTOR MUHAMMAD: All right, thank 14 you. 15 Any other LEAs have any comments? 16 MR. SANCHEZ: Madam Director, this is 17 Andrew Sanchez for the three LEAs, Gallup, 18 Grants, and Zuni. 19 I don't think there's any comments

comments for the written submissions, because for

all intents and purposes the PEDs which draw up

because -- I would also like to reserve any

20

21

1	the appeal should render it moot. So, I'm not
2	sure if time should be spent at this hearing on
3	it.
4	DIRECTOR MUHAMMAD: This is Director
5	Muhammad speaking.
6	Any comments from anyone internal to
7	Ed?
8	MS. MARTIN: I actually have a
9	question. Well we'll see I'll wait till
10	after the state if the state has any comments
11	relating to FY 20 first. I'll wait.
12	DIRECTOR MUHAMMAD: Okay. All right,
13	thank you, Jill.
14	Okay, this is Director Muhammad again.
14 15	Okay, this is Director Muhammad again. I'm going to turn it over to the state for any
15	I'm going to turn it over to the state for any
15 16	I'm going to turn it over to the state for any comments for 20. And if you're going to respond
15 16 17	I'm going to turn it over to the state for any comments for 20. And if you're going to respond in writing, then state it; that's fine.
15 16 17 18	I'm going to turn it over to the state for any comments for 20. And if you're going to respond in writing, then state it; that's fine. MR. BROSNAN: This is Aaron Kramer
15 16 17 18 19	I'm going to turn it over to the state for any comments for 20. And if you're going to respond in writing, then state it; that's fine. MR. BROSNAN: This is Aaron Kramer Brosnan with the state.

know, if there are closing arguments generally, 1 2 that we have an opportunity to respond. DIRECTOR MUHAMMAD: Okay. 3 This is 4 Director Muhammad. Noted. Thank you. I don't believe we have any 5 Okay. other -- I'm just checking to make sure there 6 7 aren't any outstanding questions in the chat and/or -- I believe there was a request for the 8 9 deck, and that was addressed already. 10 MS. MARTIN: I do have one question, 11 if that's okay. This is Jill Martin, again. 12 DIRECTOR MUHAMMAD: Yes. Go ahead. 13 MS. MARTIN: Okay. Question for the 14 state about FY 20 relating to the proportion. I know you stated earlier that the 15 16 state is already applying the new proportion for 17 FΥ 21 that takes a district-by-district 18 approach. And so those impact aid districts that 19 have a lesser percentage under the state's 21 20 data, the state is already reducing the amount of 21 state aid that those districts -- sorry --22 increasing the amount of state aid to those

1	districts due to the lesser proportion.
2	But what about for FY 20, has that
3	occurred, or, if not, when would that occur?
4	MR. BROSNAN: This is Aaron Kramer
5	Brosnan with the New Mexico Public Education
6	Department.
7	The state's plan is once certification
8	for FY 2020 is received, at that point any state
9	aid that would be posed to a district because of
10	a reduced proportionality would be returned, in
11	accordance with the assurance that the state
12	signed prior to FY 2020.
13	DIRECTOR MUHAMMAD: Thank you.
14	MS. CHAPPELLE: Director Muhammad. I
15	actually have a clarifying question on this point
16	made by Ms. Martin as well. I'm just trying to
17	wrap my mind around it, if I may.
18	DIRECTOR MUHAMMAD: Okay. Yes, you
19	may.
20	MS. CHAPPELLE: Thank you, director.
21	Germaine Chappelle speaking.
22	Mr. Brosnan, I just want to make sure

I understand what you just indicated, and, Ms. 1 2 Martin, was your question essentially asking the state if they were going to apply the new 3 4 formula, if approved, retroactively? Just to clarify, by new 5 MS. MARTIN: formula I was referring specifically to the 6 7 proportion of impact aid that is allowed to be 8 taken for each district. And since the original 9 submission was made with 75 percent across the board, but the new data show a much less 10 percentage could be taken for certain impact aid 11 12 districts, I was asking about that state aid that 13 would have to increase. And Mr. Brosnan replied 14 that it would be returned, basically, but has not 15 been yet. 16 MS. CHAPPELLE: Okay. So, Germaine 17 Chappelle again. 18 Essentially, Mr. Brosnan, is the state 19 withdrawing its submission -- it's 2020 20 submission and relying on just the 2021 21 submission? 22 MR. BROSNAN: Director Muhammad, this

is Aaron Kramer Brosnan from the state. Would 1 2 you like me to clarify? 3 DIRECTOR MUHAMMAD: Yes, you could go 4 ahead. I believe we spoke of it earlier, but you 5 can go ahead. The state -- I'll just say one thing, 6 7 the state submitted new fiscal year 20 data, as 8 we discussed at the beginning of the hearing. 9 Again, this is Director Muhammad 10 speaking. 11 Thank you, Director. MR. BROSNAN: 12 That would be my clarification as well. we're not -- we have two submissions: one that 13 14 discusses the appropriate disparity test of 15 proportion for FY 2020, which would be the 16 subject of an FY 2020 determination; and a 17 separate data submission for FY 2021, which would 18 be subject to an FY 2021 data submission -- or, 19 disparity test. 20 MS. CHAPPELLE: So I apologize. This 21 is Germaine Chappelle again. Just wanted to 22 clarify, the determination for fiscal year -- I

mean for school year 2019 and 2020 have been made. All we're saying, correct, Director and Mr. Brosnan, is that the state has now proffered two potential methodologies to apply for school year 2020 and 2021? Is that correct?

MR. BROSNAN: This is Aaron Kramer Brosnan of the New Mexico Public Education

Department. We have used the same methodology for these two submissions. They're both the inclusion method on a revenue basis.

DIRECTOR MUHAMMAD: And this is

Director Muhammad speaking again. And now we're

looking at that new data for fiscal year 20, the

resubmitted data.

MS. CHAPPELLE: Thank you, Director.

And just to clarify, when we are referring to fiscal year 20, that's for this current fiscal year, the one we're in right now, because the previous one has already been determined. And that's all I'm trying to make sure I understand. I just want to be careful with our language.

1	DIRECTOR MUHAMMAD: Just want to make
2	sure I'm clear here on your question. So, right
3	now
4	MS. CHAPPELLE: Well, I
5	DIRECTOR MUHAMMAD: Go ahead. Who was
6	speaking? Jill?
7	MS. CHAPPELLE: It was Germaine. My
8	apologies.
9	DIRECTOR MUHAMMAD: Oh.
10	MS. CHAPPELLE: I just don't want
11	there to be any confusion on the record that we
12	are in any way, with this hearing, reopening the
13	decision from last year. That's my primary
14	concern.
15	And, Ms. Martin, I was a little
16	concerned with the answer to your question
17	because I thought the state, kind of, had two
18	varying formulas. The one we're referring to is
19	for 2020, and then the other, the proportionality
20	that we're referring to as the 2021.
21	And so I just want to be very careful
22	with our language because, as it stands now,

especially with the withdrawal of the appeal, the state could not take a credit for impact aid for last year. And I just want to be clear that we're not reopening, that situation.

MS. MARTIN: So this is Jill Martin again.

Both sets of data, one for FY 20 which is the date to year that we did make a determination on in April. Yes. That is now under reconsideration as stated in the hearing notice that was sent out, I believe, three times because of change in dates. And we do want to thank everybody for being so flexible on changing those dates.

But, yes, there's two different fiscal years under consideration. One is FY 20 and one is FY 21. I agree with you it's important to be precise on language because when people refer to a different method or different formula there's two different things being discussed today. One is the exclusion method versus inclusion method of the disparity test. And the other one is the

proportion which is set by Federal regulations and there's not a different formula. There's only one formula for that. It's the proportion that is the amount of local revenues covered by the organization divided by total local tax revenues. And so there's two different things that are, I think sometimes being talked about as a method or formula. So, just clear on that.

Thanks.

MS. CHAPPELLE: Thank you, Ms. Martin.

And this is Germaine Chappelle again.

And just to be clear when we're saying that we

are re-looking at 2020 data we are not, please

help me just confirm, reopening last year's

determination. Is that correct?

MS. MARTIN: The Impact Aid Program is looking at the new data submission that is for FY 20 as well as the data submission for FY 21. And it is done on a different basis. It is done on the inclusion method instead of the exclusion method. And that is because the state appealed the initial decision to the administrative law

judge and as Amanda went through in the

PowerPoint in the beginning of the presentation

when she went through the procedural history of

all of the events I do recognize that it is very

confusing to be discussing two different fiscal

years at one time like this. Which is why we

tried the Impact Aid Program divided the agenda

like it did into the different issues with fiscal

years.

MS. CHAPPELLE: So, now that the appeal has been my apologies, Germaine Chappelle with a clarification.

Now that the appeal has been withdrawn there is no appeal pending and last year's determination remains a final decision, is that correct?

DIRECTOR MUHAMMAD: This is what I stated at the very beginning that we were not going to comment on today because that development just occurred very late on Friday. And there has not been any action by the administrative law judge.

MS. CHAPPELLE: Okay. I just wanted to be careful on that. I didn't want it to appear that our position in any way waived, the position I just articulated, which is last year's decision is absolutely a final decision. And we are looking prospectively not retroactively with this particular hearing. That's all I'm trying to be careful on, Ms. Martin, because I do agree with you. We've got formulas and we've got methodologies and we've got data and I do think in some ways we have potentially confused some of those references.

MS. MARTIN: Right. I want to repeat something that was stated by the director and by Amanda earlier in the presentation which is that we will be taking comments on that FY 20 new data submission by the state. So, if you wish to submit any comments on that you will have the post comment period in which to submit comments. So that is your opportunity. We will be looking at that data submission, yes.

DIRECTOR MUHAMMAD: And this is

Director Muhammad.

Thanks, Jill, for that clarification.

I'm going to make sure Ms. Chappelle understands
that.

MS. CHAPPELLE: And I appreciate that because if we are perceived as looking at this retroactively then we will want to protect our appeal rights on that point as well.

DIRECTOR MUHAMMAD: This is Director Muhammad. Thank you.

MR. SANCHEZ: Madam Director, this is Andrew Sanchez with the Gallup, Grants, and Zuni. In light of what Ms. Martin is indicating, and the objection we made earlier, I just renew my objection. I'm not sure where the Agency has the ability quite frankly or the authority to remove the 2020 data and do another redetermination predetermination of that data when the matter is pending in another aspect of the Agency's Administrative Law Judge.

I don't expect an answer. I don't expect a remedy but I do want to point out for

the record that it seems to me that the Agency has created another level of due process for the state to partake in and has left open and has undermined the appeal process that exists in front of the Administrative Law Judge.

So, I understand that there is new data, but shouldn't that have been left to the ALJ with regards to whether or not it was timely, whether it was appropriate, rather than to make having another adjudicative function here with regards to that? That's just the objection for the record.

DIRECTOR MUHAMMAD: Noted, thank you.

MS. MARTIN: And this is Jill Martin

again.

Thank you, and we did explain, I believe, the Impact Aid Office Hearing Notice did explain that the administrative law judge issued a stay of that proceeding pending a redetermination of FY 20. So, that's on the record and you can certainly look at that notice to understand that further. Thanks.

DIRECTOR MUHAMMAD: Okay. All right.

This is Director Muhammad. If there

aren't any other comments I'm going to move

forward with closing out this hearing.

So, thank you all once again for

participating in this hearing. And we appreciate

participating in this hearing. And we appreciate all the information we received today and note that we will limit our determination and analysis to issues regarding the disparity data under the current statute and program regulations.

As we mentioned at the beginning this hearing was recorded and we will have a transcription within approximately two business days. The transcript will be sent to all attendees who spoke to allow for corrections. We have arranged for an accelerated transcript due to the urgency of this submission.

We recognize the large sums of money involved and the need for certainty on fiscal year 21 for both the state and the District.

Our regulations requires us to accept post-hearing comments that are submitted within

15 days. You will have until September 15, close of business, to submit written comments including any additional data or information you would like for us to consider.

Although the regulations also provide that we may extend a period for an additional 15 days for good cause we are not inclined to do so in this case due the urgency, as mentioned already, and the fact that you'll have a transcript sooner. We're expediting that as stated.

However, if you feel that there is good cause to extend the deadline for written comments, please send your request for an extension today or tomorrow to my attention to my email address which is my first dot last name at ed.gov so that we can make an immediate decision.

As for now please assume that all parties must submit written comments by COB on September 15. And please email those comments to myself and my senior analyst Amanda Ognibene.

Thank you once again for your

1	participation in this hearing if there aren't any
2	additional comments from anyone at this
3	particular time then I'm going to close the
4	hearing. I'll pause just to see if there are any
5	other comments from anyone else who hasn't
6	spoken.
7	MR. BENAVIDES: Director Muhammad, this
8	is Daniel Benavides, Superintendent from CCSD.
9	How are you doing today?
LO	DIRECTOR MUHAMMAD: I'm well. How are
L1	you?
L 2	MR. BENAVIDES: I'm good, thank you.
L3	Our general counsel she's trying to
L 4	get back on so if you could wait a few minutes.
L5	She just got dropped, but she's trying to get
L6	back on. If you could humor us, I'd appreciate
L7	that. She may have something left.
L8	DIRECTOR MUHAMMAD: Okay. Not a
L9	problem.
20	And thank once again to everyone for
21	their flexibility with the scheduling and with
22	any technology issues today.

While we're waiting, I know we also 1 2 have other LEAs on the call at this time while we're waiting for the attorney. Are there any 3 4 comments? 5 MR. BROSNAN: This is Aaron Kramer Brosnan of the New Mexico Public Education 6 Department. I just have a quick comment, if 7 8 that's okay, Director? 9 DIRECTOR MUHAMMAD: Yes, Aaron, go 10 ahead. 11 MR. BROSNAN: I would just request that the NMPED be provided a copy of the PowerPoint 12 13 that was used by the Districts in today's 14 hearing. DIRECTOR MUHAMMAD: This is Director 15 16 Muhammad speaking. I believe there was a request 17 in the chat. Let me go back and look, and see it 18 and who was presenting that. I believe they 19 stated they can share that presentation. 20 correct? 21 MR. BROSNAN: Yes, that would be great 22 if it could be perhaps shared through the chain

with the notice so that everyone in the state 1 2 receives it. DIRECTOR MUHAMMAD: This is Director 3 4 Muhammad speaking. I believe it was Germaine 5 Chappelle. MS. OGNIBENE: Right. It's a good idea 6 for the Districts who used the PowerPoint to use 7 8 a reply all on the email that was the agenda, so 9 that all attendees could get a copy. MR. BENAVIDES: Director Muhammad, this 10 is Daniel Benavides, Superintendent of Central 11 12 Consolidated Schools. She's trying to dial the 13 number but for some reason the number is saying 14 that that number is incorrect. So she may have 15 to call us and jump on, but we're trying to see 16 if she has any closing comments. I appreciate 17 your patience. 18 DIRECTOR MUHAMMAD: Ok. No problem. 19 MR. HYATT: Director Muhammad, this is 20 Mike Hyatt from Gallup-McKinley Country Schools. 21 I have one quick question about the stay. 22 okay that I ask?

DIRECTOR MUHAMMAD: Yes. This is 1 2 Director Muhammad, go ahead. MR. HYATT: So, first of all, I know 3 4 that you mentioned the stay at the start of the 5 meeting today. Who received a copy of that stay, and can we receive a copy of that stay? 6 7 DIRECTOR MUHAMMAD: This is Director 8 Muhammad. I believe our counsel received a copy. 9 Jill, or Colin, do you want to respond? MS. MARTIN: Yes, this is Jill Martin. 10 11 I believe the attorneys for all of 12 these districts have a copy of the ALJ's stay. And also for other districts that don't have a 13 14 copy, then the Impact Aid Program would be happy to provide that. You could send in an email. 15 16 MR. HYATT: Thank you. 17 DIRECTOR MUHAMMAD: This is Director 18 Muhammad again. Perhaps if your attorney cannot 19 get back on shortly, we can close and she can submit her closing remarks in writing. 20 21 will stay on for about another five minutes or

so.

1	MR. BENAVIDES: Okay. Director
2	Muhammad, this is Daniel Benavides,
3	Superintendent from Central Consolidated.
4	For some reason neither AT&T or
5	Verizon are able to get her out right now, at
6	least our location. I'm asking if the team down
7	in Gallup can reach out to Germaine and get her
8	on speaker, because we're having a hard time
9	dialing out for some reason as well.
10	DIRECTOR MUHAMMAD: It may be the
11	weather. This is Director Muhammad. Is the team
12	from Gallup on? Did they hear the request?
13	MR. BENAVIDES: Director Muhammad, we
14	have our own lines here. Hold on one second.
15	DIRECTOR MUHAMMAD: Okay, thank you.
16	MR. BENAVIDES: Okay, Germaine, you're
17	on speaker.
18	MS. CHAPPELLE: Hi. My apologies,
19	Director Muhammad. For some reason I wasn't
20	allowed to dial back in. I just kept getting an
21	error message. My apologies.
22	DIRECTOR MUHAMMAD: No problem. You

can go ahead, please.

MS. CHAPPELLE: So, are we at that point where we are just closing out?

DIRECTOR MUHAMMAD: Yes, ma'am, uh-huh.

MS. CHAPPELLE: Okay. Okay, great.

You did well. It's almost 3:00. On time.

So, on a closing standpoint, Director Muhammad and parties, what we are talking about is essentially disproportionate impact. The state has articulated an alternative methodology by which it wishes to qualify for impact aid.

Our concern, and we will definitely include this more distinctly in briefing, is that as applied with respect to, you know, existing New Mexico law, that particular methodology, meaning the proportionality methodology, actually seeks to create a great disproportionate impact than the previous methodology. And the reason that we see that and see that is that within the next two years both Gallup and CCSD demographically from a tax perspective are likely to look a lot more like a Zuni. And the reason

for that is disproportionately a number of industrial complexes are slated to close within the next five to ten years surrounding the Navajo Nation.

And with respect to that, our shares are coming from at least 30 percent of those kids do not have running water, do not have electricity, do not have access to WiFi, don't actually have indoor plumbing. Ann so what we are looking at in our districts is not only the historic gap that we've all identified our school having, which is supposed to be addressed by Impact Aid. We now have a COVID gap, which is, so many of our students are remote and of such a rural nature that we can't even effectively long distance learn with those kiddos, and we are having to jump through many hoops to make sure that we do that. And, of course, that is our utmost priority.

So now what we have is a layering of gaps that these students are facing: poverty gap, remote-rural gap, there's a funding gap, and now

obviously the COVID gap.

I recognize that both the state and our LEAS all serve the same client, which are students, and obviously the communities of those students. But the ongoing concern that we have is, sure, the state has decided to kind of turn from its previous methodology. The methodology that it's now choosing, however, clearly articulates, as was shown by Mr. Romine, that that particular methodology benefits greatly the most wealthy and hurts the most poor of our districts.

So, from the standpoint of what Impact Aid was actually intended to correct, coming out of the Kennedy reports, we are from that at this point. And so, as our briefing will demonstrate, this isn't the solution to bridging the gap for these students, and we will continue to articulate that.

I do have great concern about the potential that even though a stay was issued on the appeal, that we have not really honored that

stay and are actually, it sounds to me, looking 1 2 back retroactively on last year's determination, and so we will also address that. And, of 3 4 course, we will address the concerns about state 5 law as well. And with that I stand for any 6 7 questions. 8 DIRECTOR MUHAMMAD: All right. This is 9 Director Muhammad. If you could just restate 10 your name for the record and title. MS. CHAPPELLE: My pleasure, director, 11 12 and my apologies for not doing so. Germaine 13 Chappelle, and I am an attorney for CCSD working 14 with the broader team of CCSD, Gallup, Zuni, and 15 Grants. 16 DIRECTOR MUHAMMAD: Okay. Thank you. 17 I appreciate it. 18 Okay. Let's see. This is Director 19 Muhammad. I believe we're at the conclusion of 20 the hearing. I just want to make sure I pose the 21 question again. Are there any other districts

that care to make any comments at this particular

1	time?
2	Okay. Any additional comments from
3	the Department, I mean from the Department of
4	Education. U.S. Department of Education.
5	MS. OGNIBENE: This is Amanda Ognibene.
6	I don't have any further comments or questions.
7	DIRECTOR MUHAMMAD: All right. So at
8	this point I'm going to conclude this hearing,
9	and as stated, I just want to remind everyone of
10	by September 15 to please submit your written
11	comments. And we hope to have a transcript to
12	you within two business days.
13	Thank you and everyone please stay
14	safe and enjoy the rest of your day.
15	(Whereupon, the above proceeding went
16	off the record at 4:53 p.m.)
